Wednesday evening — Highways; Police.

Thursday evening — Fire Department; Sewerage; Printing.

Friday evening — Accounts.

First Thursday evening after first Monday each month — State Aid, Military Aid and Soldiers' Relief.

MAYOR'S
INAUGURAL ADDRESS.
1896.

INAUGURAL ADDRESS
OF
HON. ANDREW R. CURTIS.

Gentlemen of the City Council:

In assuming the duties and responsibilities of this office, I do so with feelings of profound gratitude for the high honor conferred, and I trust you will aid and assist me in making this, our administration, a success, and one that will fully meet with the hopes and expectations of those who have intrusted to us the interests and welfare of our city.

At no period in the history of our city would our acts have been more carefully scrutinized, our abilities as public servants more severely tested, than during the ensuing year.

It therefore becomes us to be more careful and guarded in dealing with all questions or measures which involve the expenditure of the people's money; to be more economical and judicious in making our appropriations, and to expend the same only for that

which is a public necessity, and in accordance with a firm resolve not to exceed or overdraw.

While this involves for us cares, responsibilities and a strict attention to business, yet if we are successful, our reward will be the approval and appreciation of our services by the people.

FINANCE.

As the financial statement for the year ending December 21, 1895, has been published in our local papers, and is now before you subject to your perusal, it is needless for me to again repeat it in detail. The overdraft by this statement appears to be \$10,119.12. This is exclusive of several outstanding bills which should have been presented and paid.

The net decrease of debt appears to be \$18,510.57. The overdraft does not seem to affect the showing made in the decrease of the city debt, but is carried over to be provided for by the succeeding administration when the appropriations are made. To state it briefly it will be as follows:

An overdraft of \$10,119.12, plus the amount represented by outstanding bills to be deducted from future appropriations. The remainder being the sum with which the city's business is to be transacted.

You will further notice in this statement, that 13 shares of the Boston & Maine stock have been sold, for which was received \$2,338.37. The sum has been applied to the reduction of the city debt. The balance of the Boston & Maine stock on hand is 411 shares, which if sold whenever the city could by so doing recover its original investment, would reduce the debt \$71,661.63. I would submit that this should be done, as in my judgment it is both unsafe and unwise to hold this stock for speculative purposes.

HIGHWAYS AND SIDEWALKS.

This department has for a number of years largely overdrawn its appropriations. The needed improvements that have been made upon our streets may have justified, to a certain extent, these overdrafts; but that there is a chance to effect a saving of the public money by correcting several abuses known, is apparent to all.

One thing in particular to which I wish to call your attention, is the unusual activity displayed upon our highways by the employment of a large number of men and teams a week or two prior to our city elections; work being immediately suspended thereafter.

I would respectfully submit that quite a saving could be made by systematically doing this work earlier in the season, when the ground is more pliable, and when by the application of less labor, the same, if not greater results, could be accomplished.

There have, however, been many needed improvements made upon our highways during the past year; the more noticeable one was the macadamizing of Water street. The former condition of this street and the commercial uses made of the same, fully justified the expenses incurred. In making future improvements I would suggest that they be confined to those thoroughfares which are most frequently used and where the public convenience can be best subserved.

SIDEWALKS.

The improvement of sidewalks during the past three years has been exceedingly burdensome. The extreme difficulty in collecting, and the numerous applications for relief from the assessments levied, furnish sufficient evidence of this fact.

The amount expended during the above named period is \$37,855.03, one-half of which, \$18,927.50,

has been assessed upon the abutters; there remains uncollected, \$5,846.38.

In view of the great amount of work accomplished, I would recommend that no more enforced improvement be made during the ensuing year than is absolutely necessary.

POLICE.

Complaints against this department have been so frequently made as to attract the attention of the public and cause a general demand for a change. How to make this change and to so reorganize this department as to insure that needed discipline which is so essential to the peace and good order of the community, presents to us a problem which is not easy to solve.

Were I to be asked the question, what change could be made that would be productive of the best results, without hesitation the answer would be: the selection of a man to be city marshal who would fearlessly enforce the law, and by his deportment and character command the respect and esteem of his subordinates.

In my endeavors to select such a man I find that the choice is limited after all, to the very few who apply; for those who are in every way qualified to

discharge the duties of this office cannot be prevailed upon to accept it. Under these trying circumstances I must select one from the few, who is not the "ideal man," but the one who will discharge his duties more acceptably than either of the others.

In making changes in the subordinate positions in this department, to improve the service, we also meet with other obstacles that make it extremely difficult to effect the desired change. Not only must we observe the civil service act in our selections, but we are more especially enjoined to comply with the requirements of the veterans' preferment act, recently become law.

Under the civil service act applicants for the police must pass a mental and physical examination, and must not be under 22 years of age nor over 40. Under the veterans' act a veteran of the late war, who has been honorably discharged therefrom, is not required to pass even a physical examination, and regardless of his fitness or age, his name is placed at the head of the list, and must be preferred to one who is not a veteran.

I dwell upon this subject longer than I would were it not that many of our citizens expect to see changes by removals, but do not realize that under the act heretofore mentioned, such changes cannot be

made without seriously impairing the efficiency of the force.

The discipline of this department can, no doubt, even under these adverse circumstances, be greatly improved by a reorganization, and with the advice and consent of the board of aldermen, this shall be accomplished.

WATER QUESTION.

The ten years having elapsed, when under the act of 1880 the city was given the option of purchasing the water plant, this question was presented to the people. Since that time it has in various phases occupied their attention to the exclusion of other important municipal affairs.

It is now being tried before a commission appointed by the supreme judicial court; the evidence to be offered by the city, and the arguments of counsel will soon be concluded. The award will be a matter of conjecture for some time yet to come, and until this is rendered will be a source of deep concern to our citizens.

But in the meantime the people can rely upon this fact: That the case has been well and ably presented to a commission composed of members who have acquired distinguished reputations for honor and

ability in their professions, and who will not favor either party, but will return an award in accordance with the evidence and facts presented.

But should the award be considered by legal authorities excessive, the necessary steps shall be taken to protect the city's interests.

PARKS.

During the past few years considerable attention has been given to the development of our parks, and with but one exception they have been greatly improved and now present a fine appearance, adding much to the natural beauties of our city.

The park, or common, situated at the north end on the line of the street railway, and known as "Atkinson Common," containing some thirteen acres of land, was given to the city on condition that it be accepted and used as a common.

As nothing was done by the city authorities to improve it, in compliance with the expressed or implied wish of the deviser, a few of our public spirited citizens, with ladies, formed a society about two years ago, for that purpose. By giving entertainments and by contributions from which they have already realized and expended upon it enough in making such improvements, to demonstrate that

when completed, in accordance with a plan prepared by them, it will be the finest park in this section of the state. I would therefore, in order to afford our citizens an opportunity to have a place for recreation and pleasure, recommend that a small sum of money be appropriated annually, to be expended by the commissioners of "Atkinson Common," in completing these improvements in accordance with said plan.

FIRE DEPARTMENT.

The expense of this department has been largely increased, owing to a requirement by the underwriters to keep and maintain at the Central Fire Station an extra pair of horses and one permanent fireman. It was deemed advisable to comply with the same to prevent a large increase in the rates of insurance.

The machines and appliances used in the extinguishment of fires are in good order, and with the exception of the purchase of 500 feet of hose, which is needed, will not necessitate the expending of any unusual amount for repairs.

The discipline and the promptness in response to an alarm of fire is as noticeable as ever and contributes much to the feeling of security and confidence

the people have in the ability of our firemen to successfully cope with a conflagration.

SCHOOL DEPARTMENT.

The legislature of 1895 passed an act, allowing the city to increase its indebtedness \$10,000, for the purpose of building a school house.

As the committee were divided in their opinions as to the location and the building needed to relieve the congested condition of our schools, it was not constructed. Whether we shall be asked to provide the means this year, I am unable to say.

We may feel assured, however, that the committee, composed as it is of citizens devoted to the interests and welfare of our city, will not urge its construction unless it is a public necessity.

POOR DEPARTMENT.

This department is controlled by a board of overseers who have full power to expend the appropriation to be provided for by the city council. As their report has been submitted and approved by you, it will be unnecessary for me to repeat.

I feel compelled to say, however, that the board is composed of members who have demonstrated their abilities to successfully manage its affairs, and

to insure for our city a department that is second to none.

RECOMMENDATION.

In view of the increasing burdens which are being imposed by the state upon the city clerk, in addition to his arduous duties in connection with municipal affairs, I would recommend for your consideration the expediency of electing an assistant city clerk, who will be qualified to assume the duties of this office in case of a prolonged absence of the present official, by reason of sickness or other causes.

CONCLUSION.

In conclusion permit me to say, that as there is always more or less concern in regard to the policy of the incoming administration in dealing with the illicit liquor traffic, and enforcement of other laws affecting the morality of our city, I feel compelled to define mine.

While I am opposed to the present monopolistic method of legalizing the sale of liquor, yet as the sworn servant of the people, I shall do all in my power to prevent and suppress the illegal sale thereof.

The enforcement of all other laws which will in any way tend to elevate the morals of our city and

place her in the van of all the cities of our commonwealth, shall receive my earnest support.

And now, gentlemen of the city council, as we are about to enter upon our duties, let us do so with a firm resolution to work in harmony, keeping in view the welfare of our city and the success of our administration.

FORTY-SIXTH ANNUAL REPORT
OF THE
CITY AUDITOR
OF THE
RECEIPTS AND EXPENDITURES OF THE CITY
OF NEWBURYPORT
FOR THE
Year Ending December 19, 1896.

REPORT OF THE COMMITTEE ON FINANCE.

CITY OF NEWBURYPORT, December, 1896.

To the City Council of the City of Newburyport:

GENTLEMEN:—The Joint Standing Committee on Finance respectfully submit the following statements and reports of the City Treasurer and Collector and the City Auditor for the financial year ending December 19, 1896.

The books and accounts of the City Treasurer and Collector have been examined, under the direction of the committee, by the City Auditor and found by him to be correct and properly vouched.

For the Committee,

ANDREW R. CURTIS, Chairman.

REPORT.

CITY OF NEWBURYPORT, }
AUDITOR'S OFFICE, Dec. 19, 1896. }

To the Committee on Finance:

GENTLEMEN:—In conformity with the requirements of the city ordinances, I herewith submit the forty-sixth annual report of the receipts and expenditures of the city of Newburyport, for the financial year ending December 19, 1896, (including the sum of \$10,119.12 expended in the year 1895 and remaining unpaid Dec. 21, 1895), together with a statement of the city debt and debts due the city, and a schedule of the real and personal property belonging to the city. I have audited the books of the city treasurer, and find them correct and properly vouched. I examined all securities in possession of the treasurer belonging to the city, including the sinking fund investments, and found the same properly accounted for. They are deposited for safe keeping in the vaults of the Merchants National bank.

I verified the accounts of the collector of taxes, including the amount committed to him by the assessors, the abatements made by them during the year, and the amount collected.

I examined the cash account as kept by the city clerk, of all moneys received by him as fees or otherwise, (except dog licenses), during the year ending Dec. 19, 1896, and found the same correct. The total amount collected has been paid to the city treasurer, and a receipt taken therefor.

I examined the books of the clerk of the overseers of the poor, and found that the bills as approved by the overseers of the poor correspond with the payments made by the city treasurer.

I examined all bills passed by the committee on accounts, as presented weekly and monthly, and found the same correctly cast, properly approved and accurately placed upon the books.

The books of the treasurer show an increase of the city debt during the year of 1896 of \$6,731.12. The unexpended balance is \$451.05.

Very respectfully,

WILLIAM H. WELCH,

City Auditor.

ANNUAL REPORT
OF THE
OVERSEERS OF THE POOR
OF THE
CITY OF NEWBURYPORT
FOR THE YEAR 1896.

REPORT.

To the City Council of the City of Newburyport:

GENTLEMEN:—The Overseers of the Poor, to whom is committed a general oversight and care of the poor in all of its departments, would respectfully submit their eighteenth annual report:

GENERAL STATEMENT.

The total cost of the poor department for the year ending Nov. 30, 1896, has been \$22,723.49. This includes the sum of \$5,987.35 paid for the support of insane,—an expense over which the board has no control—\$2,280.91 for fuel, \$931.60 for improvements on the almshouse property, \$350.00 for medicine, and \$350.00 for city physician's salary.

The income received during the year from various sources was \$3,797.18, showing the actual amount expended by the overseers of the poor to have been \$18,926.31, from which should be taken the improvements on the almshouse property \$931.60, leaving the actual cost of caring for our poor \$17,994.71, which is \$398.21 less than last year.

FOR AID.

		\$18,926	31
Less improvements at almshouse		931	60
Net cost of poor department		\$17,994	71
Appropriation, \$19,000; undrawn, \$73.69.			

ALMSHOUSE.

The almshouse during the past year has been under the care of Mr. and Mrs. Charles W. Nelson, one or more of the overseers of the poor visiting the house every few days.

An average of 41 persons have resided in the almshouse during the year, at an average cost of \$2.08 per week.

Jan. 1, 1896, inmates at the almshouse, 48; 31 males and 17 females.

Jan. 1, 1897, 27 males, 20 females—47.

INSANE.

The cost to the city for the care of its insane, and of children in the school for the feeble minded, has consumed \$5,987.35, almost one-third of the appropriation which was granted for the support of the poor.

There are now in Danvers asylum 24 persons; at Westborough 1 person; Worcester, 5 persons; Medfield, 6 persons; private family, 1 person. Making 37 insane who are supported at this date, Dec. 31, 1896.

OUTSIDE RELIEF.

Outside relief, which last year was granted to 393 persons, this year has been granted to 277, and are classed as follows: 180 having a settlement in Newburyport; 63 having a settlement in other places; 14 persons having no settlement in the state; 20 persons have been sent out of the city. Making a total of 277 persons who have been assisted during the past year.

CITY PHYSICIAN'S REPORT.

To the Overseers of the Poor:

GENTLEMEN:—I herewith submit the report of the city physician for the year 1896:

I have made at the home of the patients 1000 visits, and have received at my office 195 visits, making a total of 1195 visits during the year.

There have been 16 deaths during the past year among the poor of the city from the following causes:

Broncho pneumonia.....	4
Aortic disease of heart.....	2
Senile decay.....	2
Mitral disease of heart.....	1
Acute Alcoholism	1
Appoplexy.....	1
Dyspeptic diarrhœa.....	1
Cancer of uterus.....	1
Marasmus	1
Congenital debility.....	1
Pulmonary tuberculosis.....	1

16

There have been 10 births during the year—3 males and 7 females—all outside of the almshouse.

Respectfully submitted,

C. C. DAY, City Physician.

PRODUCTS OF CITY FARM.

The products of the city farm during the past year were 30 tons hay, 110 bushels corn, 80 barrels onions, 700 cabbages, 300 bushels potatoes, 20 bushels dry beans and peas, 100 barrels apples, 3 tons squash, 25 bushels turnips, 75 bushels beets, 25 bushels carrots, 25 tons ensilage—with green corn, peas, string beans and tomatoes enough to supply the almshouse with all the vegetables they needed.

980 lbs. butter have been made, 5680 lbs. hogs have been dressed, and 300 lbs. lard have been rendered.

All the labor upon the farm has been performed by the inmates of the almshouse under the direction of Mr. Lyman W. Lord, who has had charge of the farm for many years.

Respectfully submitted,

L. W. SARGENT,	} Overseers of the Poor.
J. C. STEVENS,	
L. W. BROWN,	

WILLIAM H. BAYLEY, Clerk.

ATWOOD AND DEXTER FUNDS.

To his Honor the Mayor and the City Council:

GENTLEMEN:—The board of overseers of the poor, to whom is intrusted the income accruing from these funds, would respectfully report that the income from the Dexter fund for the year ending Dec. 31, 1896, amounting to \$90, has been divided among the three overseers, \$30 to each.

The income from the Atwood fund—\$315, has been divided in a similar manner, giving \$105 to each overseer, and has been distributed according to the will of the donors, in the following manner.

DEXTER FUND.

In wards one and two the \$30 of the Dexter fund, nothing remaining over from last year, has been distributed among eight persons, in sums from two to five dollars each, leaving nothing on hand of this fund at the close of the year.

In wards three and four the \$30 of the Dexter fund, nothing remaining over from last year, has been distributed among twelve persons in sums from one to three dollars each, leaving nothing of this fund on hand at the close of the year.

In wards five and six the income from the Dexter fund, \$30, has been distributed among twelve persons in sums of from one to three dollars each, leaving nothing of this fund on hand at the close of the year.

ATWOOD FUND.

In wards one and two the income from the Atwood fund, \$102.50 with \$31.98 remaining on hand at the close of last year—\$134.48, has been distributed among twenty-eight persons in sums of from 50 cents to five dollars each, leaving \$42.23, which has been transferred to Mr. B. F. Hathaway, the overseer of wards one and two.

In wards three and four the income from the Atwood fund, \$102.50 with \$17.25 remaining on hand at the close of last year—\$119.75, has been distributed among thirty-six persons in

sums of from fifty cents to four dollars each, leaving \$46.23 of the Atwood fund on hand at the close of this year.

In wards five and six the income from the Atwood fund, \$102.50 with \$62.25 remaining on hand from last year—\$164.75 has been distributed among forty-one persons in sums of from twenty-five cents to five dollars each, leaving \$63.00 of this fund on hand at the close of the year.

At the close of the year, Dec. 31, 1896, there remained in the hands of the overseers:

Wards one and two--Atwood fund	\$42 23
“ three and four— “ “	46 23
“ five and six— “ “	63 00

Respectfully submitted,

L. W. SARGENT,	} Overseers of the Poor.
J. C. STEVENS,	
L. W. BROWN,	

ANNUAL REPORT

OF THE

Chief Engineer of the Fire Department

OF THE

CITY OF NEWBURYPORT

FOR THE YEAR 1896.

REPORT.

HEADQUARTERS FIRE DEPARTMENT,
CENTRAL STATION,
NEWBURYPORT, DEC. 31, 1896. }

*To His Honor the Mayor and Gentlemen of the City
Council:*

In compliance with the requirements of the city ordinance governing the fire department of the city, I herewith submit to you my second annual report of the condition and work performed by this department for the year ending December 31, 1896, together with a list of members with their rank, age, residence and occupation, location of fire alarm boxes, a statement of receipts and expenses, fires and alarms, losses and insurance as near as could be ascertained, and such suggestions as I think will be necessary for the good of the department.

The department is in very good condition and the force under good discipline. The members have

been prompt in responding to alarms and by their quick work have prevented what might have been more serious fires.

The members of the department have been especially fortunate during the year as regards accidents.

FORCE OF THE DEPARTMENT.

The force of the department consists of one chief, three assistants, one permanent man and eighty call men.

APPARATUS.

The apparatus consists of three second-class Amoskeag steam fire engines fully equipped, five hose wagons, two hook and ladder trucks, (one in commission and one in reserve), one supply wagon and one four wheeled hose reel all in good repair.

HOUSES.

There are five brick engine houses, all in very good condition except house seven.

HORSES.

We have one pair hired since May 1, 1895, which I believe has been a great help to the department, and I should recommend to still continue with them.

HARNESSES.

There are four sets of double and six single harnesses all in good condition.

HOSE.

There are 10,500 feet of $2\frac{1}{2}$ inch cotton rubber lined hose in the department, most of which is in good condition. We have also 60 feet of $2\frac{1}{2}$ inch suction hose.

WATER SUPPLY.

The water supply from the hydrants remains the same as last year, but under the present management with the proposed improvements I feel that it is a matter of time only when the supply will be equal to the demand.

HYDRANTS.

We have one hundred and seventy hydrants, most of which are in good condition.

RESERVOIRS.

We have seventeen reservoirs fed from Frog Pond, which have never failed to give a good supply.

THE FIRE ALARM.

The fire alarm is in good condition, and under the present management you may look for reliable service. One new box has been added to the system this year and I would recommend the addition of more. The storage system from all reports seems to be a success, and I would recommend that the city adopt it on the basis of economy and reliability.

NUMBER AND LOCATION OF BOXES.

12. Corner Water and Marlboro.
14. Purchase, opposite Harrison.
17. Corner Bromfield and Prospect.
23. Water near Salem.
25. Corner Purchase and Lime.

26. Federal. Steamer 2 House.
27. Peabody Mills office.
31. Corner Middle and Fair.
32. B. & M. Freight Station, Pond street.
34. State near Pleasant.
35. Police Station.
41. Winter and Washington.
42. Russell's Foundry.
45. Pleasant and Titcomb.
51. Congress. Steamer 3 House.
52. High near Olive.
53. Toppan, opposite S. Johnson estate.
61. Merrimac near Silvershop.
62. High near Tyng.
63. Hose 7 House.
64. High near Ashland.
132. Electric Car Stables.

SPECIAL NOTICE.

The location of fire alarm boxes should be known to all persons, both male and female, and the simple manner of giving an alarm in case of fire, should be a matter of common knowledge.

The board of engineers recommend to all persons to make the necessary inquiry to enable them in case of fire either to get the key and pull the box or direct others to do so. You will find the board of engineers ready at all times to give you information.

HALE FUND.

This fund for injured firemen amounts to \$6,156.61.

The firemen have been very fortunate this year in regard to accidents, none having occurred.

SICK BENEFIT FUND.

The sick benefit fund amounts to \$1,022.67. This fund is a great help to its members.

Amount paid out this year, \$189.50.

This fund has received this year a donation of \$130 from John T. Brown Esquire.

We have also added \$121, the receipts of its annual ball.

RUNNING TIME.

The running time of the department has been changed to correspond with the change submitted by the insurance underwriters.

The rules and regulations of the department are the same as last year.

APPROPRIATION AND EXPENDITURES.

Appropriation.....	\$9,800 00	
Credits.....	103 60	
		\$9,903 60
Expenditures.....		9,302 14

ACKNOWLEDGEMENT.

I tender my thanks to His Honor the mayor and gentlemen of the city council of 1896 for courtesies and co-operation, and to the committee on fire department I am pleased to say that my association with you has been of the pleasantest.

I thank the city marshal and the members of the police force, my associate engineers and the officers and members of the department for their promptness and efficiency in the discharge of their duties.

Respectfully submitted,

HIRAM H. LANDFORD, Chief Dept.

ANNUAL REPORT
OF THE
CITY SOLICITOR
OF THE
CITY OF NEWBURYPORT
FOR THE YEAR 1896.

REPORT.

To the City Council of the City of Newburyport:

Your committee on claims which it has been, in part, my duty to assist, have during the year, considered several claims against the city. A few of these are still pending, but in most cases the claimants have been given leave to withdraw and have not as yet brought suit. Under the ordinance defining the scope of this report, and by reason of the unimportant character of the claims referred to, I deem it unnecessary to trouble you with a detailed statement of the nature of each and the action taken thereon.

There were upon the trial list at the last October sitting of the Superior Court in this county six cases against the city of Newburyport ; there being no other case pending against the city with the exception of the old suit of Mary Fenton of Lynn, Mass., which it is safe to assume has been abandoned by the plaintiff. Five of these cases were disposed of as follows: The case of Elizabeth H. Hunt was

tried and the jury awarded the plaintiff three hundred dollars and costs, which have been paid.

The case of Mary B. Randall was tried and the jury awarded the plaintiff two hundred dollars and costs, which have been paid.

The case of Lottie N. Fowler was also tried and the jury awarded the plaintiff five hundred dollars and costs which have been paid.

The case of Margaret A. Chase was settled without a trial by payment of eleven hundred and fifty dollars without costs. In this case the personal injuries were so serious and painful that the city was in danger of being compelled to pay very heavy damages by a verdict of a jury if the case went to trial. For that reason and for the additional reason that thorough investigation proved that there was no valid defence upon the question of the defendant's liability, I felt constrained to recommend that the matter be compromised upon the terms above stated.

The case of Malvina A. Smith was settled by payment of three hundred dollars without costs.

The case of Humphrey Coffey was not reached for trial and is still pending. This is a suit to recover damages for injuries to his horse sustained by reason of alleged defect in the City Bridge. It is my intention to contest this case unless plaintiff is willing

to accept a sum less than the amount which it would cost to obtain a verdict for the defendant.

In each of these cases, with the exception of the latter, damages were alleged in the sum of four thousand dollars.

In the Randall and Fowler cases, the city has been reimbursed by the Haverhill and Amesbury Street Railway Company to the full amount of damages and costs of plaintiff and defendant.

The total expense to the city for final settlement of these five cases by trial and compromise has been about sixteen hundred dollars. This amount is many times larger than the total sums paid upon claims against the city of every name and nature in the years 1893, 1894 and 1895, during which I have had the honor to serve the city in my present capacity; but I am happy to state that at present the city's court docket is practically cleared.

As the management and control of the litigation between the city and the Newburyport Water Company are not in my hands officially as city solicitor, there may be some question as to the propriety of my making a statement concerning the case in this report. However I may be permitted to say that the complete report of the commissioners containing the questions of law which were saved by the parties is

ready to be submitted to the Supreme Court of this Commonwealth. The court will hear the parties, we trust, within a month or two, and take such action as it deems proper in the premises. And as I took occasion to say in my last annual report, "I have no reason to think that the result of this whole matter will be other than satisfactory to you."

In conclusion I would say that cities and towns in this Commonwealth are to be congratulated upon the fact that they are no longer exposed to that unjust and vexatious kind of litigation known as snow and ice cases. At present "no city or town shall be liable for any injury or damage to person or property hereafter received or suffered in or upon any part of a highway, townway, causeway, or bridge by reason or in consequence of snow or ice thereon if the place at which the injury or damage was received or suffered was at the time of the accident otherwise reasonable safe and convenient for travellers." This is an act of the legislature of 1896, which was approved and went into operation upon June 9th last.

Received from City Treasurer (during water hearing)	\$100 00
Disbursements during year ending December 31, 1896,	96 78
Balance paid City Treasurer.....	<u>\$3 22</u>

Respectfully submitted,

ROBERT E. BURKE, City Solicitor.

ANNUAL REPORT

OF THE

Drawtender of the Newburyport Bridge

1896.

REPORT.

NEWBURYPORT, Dec. 28, 1896.

To the Committee on Bridges and Culverts:

GENLEMEN:—The total number of steamers, sailing vessels, and sailboats passing through the draw was 1774 against 1782 in 1895. The first opening was April 2, for tug Bronx, the last Dec. 17, tug Clara E. Uhler.

Steamer Merrimac.....	355
Tug Clara E. Uhler.....	111
Tug Bronx.....	471
Tug Hazel Dell.....	239
Steam Yacht Dora.....	58
Transient steamers.....	10
Vessels.....	218
Sailboats.....	312

Total.....	1774

ANNUAL REPORT

OF THE

BOARD OF ASSESSORS

OF THE

CITY OF NEWBURYPORT

FOR THE YEAR 1896.

REPORT.

NEWBURYPORT, DEC. 22, 1896.

To His Honor the Mayor and City Council:

GENTLEMEN:—The board of assessors respectfully report the following statement of taxes for State, County and City purposes for the current year.

Assessed value of real estate.	\$7,137,500 00	
Assessed value of personal property	2,215,300 00	
Resident bank shares.	414,740 00	
		\$9,767,540 00

The rate of taxation for the year 1896 was \$16.50 on each \$1000 assessed, the poll tax \$2. Whole number of polls assessed, 3,993.

The tax on real estate \$7,137,500	
at \$16.50 is.	\$117,768 75
The tax on personal estate \$2,215,-	
300 at \$16.50 is.	36,552 45
The tax on bank shares \$414,740	
at \$16.50 is.	6,843 21
The tax on 3,993 polls at \$2....	7,986 00
	\$169,150 41

The sums required by the State, County and City are as follows :

From Edward P. Shaw, state treasurer.....	\$ 7,857 50	
From E. Kendall Jenkins, county treasurer....	10,049 12	
From George H. Stevens, city clerk, under a resolve from the city council	\$181,919 12	
Less this sum not otherwise appropriated...	32,000 00	
	\$149,919 12	
The amount of overlay being...	1,134 17	
The amount of additional assessments.....	190 50	
		\$169,150 41

The value of vessels engaged in the foreign trade exempt by law, amounting to \$64,942 85, is not included in the valuation of personal property first mentioned. The net income amounting to \$1,528 40 is included, showing a gain in the amount of said income as compared with that of last year of \$1,200.90.

The number of vessels engaged in the foreign carrying trade May 1, 1896, and parts owned in this city, consisted of 3 ships and 5 barks.

The value of exempted property is as follows :

Religious societies, real estate.....	\$299,500 00
Literary institutions, real estate.....	\$125,300 00
Literary institutions, invested funds..	91,756 39

ANNUAL REPORTS
OF THE
TRUST FUNDS
1896.

REPORT

SIMPSON FUND.

TREASURER'S OFFICE, }
December 19, 1896. }

*To His Honor the Mayor and City Council of the
City of Newburyport:*

GENTLEMEN:—I herewith respectfully submit a report of the condition of the Simpson fund at the close of the financial year ending at date, in accordance with city ordinance.

Total funds, December 21, 1895.....	\$20,000 00	
Interest on investment in 1894.....	900 00	
		\$20,900 00
Paid to City of Newburyport for watering streets during year 1896.....		900 00
Total funds December 19, 1896.....		\$20,000 00
Invested as follows: City of Newburyport note at $4\frac{1}{2}$ per cent.		<u>\$20,000 00</u>

JAMES V. FELKER,
Treasurer.

FOLLANSBEE FUND.

To the Hon. Mayor and Board of Aldermen, Trustees of the Follansbee Fund:

GENTLEMEN:—It becomes my duty to present the twenty-third annual report of the Follansbee fund, showing condition of fund, income therefrom and a statement of its distribution, for the year 1896.

Fund invested as follows:

City Note at 4 per cent, payable semi-annually.....	\$3,000 00
Deposit in Five Cents Savings Bank..	120 00
Deposit in Institution for Savings....	30 00
	\$3150 00

INCOME ACCOUNT.

Unexpended balance from last year...	\$ 9 57	
Interest on note payable in March....	60 00	
Interest on note payable in Sept.....	60 00	
		\$129 57

EXPENSE ACCOUNT.

Paid Atkinson Coal Co. on aldermen orders.....	\$38 25	
Paid Atkinson Coal Co. on aldermen orders.....	73 00	
		\$111 25
Unexpended balance to new account.....		\$18 32
Distributed by wards as follows:		
Ward one.....	\$26 00	
“ two.....	19 75	

Ward three.....	\$ 12 00	
“ four.....	17 50	
“ five.....	12 50	
“ six.....	23 50	
		\$111 25

The amount of coal distributed 28,000 lbs., (14 tons,) 48 cords of pine wood; sawed and split, 6 cords.

Total number of orders issued 26, to 18 different families or individuals, varying in amount from \$2.25 to \$6.50.

Eleven persons or families supplied once, six supplied two times each and one family three times.

This small fund for the twenty-three years it has been distributed among the worthy poor outside the almshouse, has been the means of furnishing about 450 tons of coal and 200 cords of wood.

Respectfully submitted,

GEORGE H. STEVENS, Treasurer.

ATKINSON SCHOOL FUND.

*To His Honor the Mayor and Board of Aldermen
of the City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen on the Atkinson School fund would respectfully report that it appears from the

annual statement presented by the treasurer of the board of trustees of said fund, Hon. Benjamin Hale, for the year 1896, that the fund is invested as follows:

INVESTMENT.

20 shares Merchants National Bank...	\$400 00
7 shares Ocean National Bank.....	350 00
3¾ rights in Common pasture.....	
10 acres salt marsh, more or less, in Salisbury.....	
Deposit in Institution for Savings....	2,085 88

It appears from said statement that an evening school was maintained in ward six from the income of said fund for forty evenings, taught by two competent teachers, at an expense of \$88.59.

To meet this expenditure it was necessary to use but \$14.58 of the income of deposit in the Institution for savings.

Hence the fund will be increased the present year by the difference between \$14.58 and the amount of dividends declared on the deposit in the Institution for Savings for the year 1896.

HENRY J. NOYES,
PHILIP H. BLUMPEY, JR.,
CHARLES W. JOHNSON.

Committee.

Newburyport, December 31, 1896.

BROMFIELD FUND.

*To the Hon. Mayor and Board of Aldermen of the
City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen on Bromfield Fund respectfully submit the following report on the condition of the fund and the disposition made from the income therefrom for the year ending December 31, 1896.

INVESTMENT OF THE FUND.

\$10,000 in Hospital Life Insurance Company, Boston at 4 per cent. per annum, payable annually.

INCOME.

Balance unexpended last year.....	\$ 62 21	
Interest 4 per cent., January.....	400 00	
		\$462 21

EXPENDITURES.

John Ronan, furnishing trees and planting ..	\$106 00	
R. G. Adams, ironing and bolting tree	6 99	
Thomas Marshall, cutting, etc.....	83 30	
Sundry persons, trimming, rooting, etc.....	59 78	
City of Newburyport, for sidewalk and edge-		
stone assessments.....	184 23	
		\$440 30
Balance to new account for trees.....	6 14	
Balance to new account for sidewalks.....	15 77	
		\$21 91

In accordance with the terms of the bequest, one-half of the income to be expended on shade trees on the public streets of the city and one-half expended in improving sidewalks.

Fifty-six rock maples were furnished and planted as desired by abutting owners, nearly all in the two upper wards of the city; more attention than usual has been given to trimming to get better service from the street lights.

It has been deemed wise in a number of instances to order the removal of several large shade trees, some old and decayed and some had encroached upon the sidewalks to such an extent their removal was considered a public convenience.

Many of the petitions for removal are not called for public convenience or necessary for private improvements and should be dealt with accordingly. A judicious trimming or thinning out is all that should be allowed. The symmetrical appearance of the shade tree on our public streets should be considered.

Sidewalk improvements adjoining eleven different estates have been allowed, assuming in some cases one-half the expense assessed thereon by the city but not to relieve said estates in the future of liability for one-half the expense of repairing of same that may be necessary. The above named improvements were for edgestones and concrete walks.

FRANK H. PLUMER.
MOODY KIMBALL,
WILLIAM C. COFFIN,
Committee.

Newburyport, Dec. 31, 1896.

GREEN FUND.

*To His Honor the Mayor and Board of Aldermen
of the City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen, in whose care and custody the Green fund is held in trust for the benefit of the public library, respectfully present the following report of the condition of the fund and the disposition made of the income therefrom.

INVESTMENT.

City note at 4 per cent, interest payable semi-annually \$2,000 00

INCOME.

Interest payable February.....	\$40 00	
Interest payable August.....	40 00	
		\$80 00

By order of the committee the income for the year 1896 was paid to the directors of the public library to be by them expended in the purchase of works on American History, and especially in the collection of histories of New England towns in accordance with the will of the donor. For more particular details, the annual report of directors of the public library is referred to.

PHILIP H. BLUMPEY, JR.,
HENRY J. NOYES,
CHARLES W. JOHNSON,

Committee.

Newburyport, Dec. 31, 1896.

ABRAHAM WILLIAMS FUND.

*To His Honor the Mayor and Board of Aldermen
of the City of Newburyport.*

GENTLEMEN:—The standing committee of the board of aldermen on the Abraham Williams fund held in trust by the board of aldermen for the benefit of the public library of this city would respectfully submit the following report in accordance with provisions of rules and regulations adopted for the care and custody of such funds.

INVESTMENT.

City note at 4 per cent, interest payable annually in March.....	\$1,000 00
---	------------

INCOME.

Paid by order of the committee to the directors of the public library.....	\$40 00
---	---------

The donor of the above bequest made no request as to the application of the income. For information touching this matter, the annual report of directors of the public library is referred to.

PHILIP H. BLUMPEY, JR.,
HENRY J. NOYES,
WILLIAM C. COFFIN,
Committee.

Newburyport, Dec. 31, 1896.

BROWN FUND.

*To His Honor the Mayor and City Council of the
City of Newburyport.*

GENTLEMEN:—The joint standing committee on Brown fund, in accordance with the provision of rule 3, of rules and regulations in relation to trust funds, under the control of the City council, would report the fund invested as follows:

INVESTMENT.

City note at $4\frac{1}{2}$ per cent. interest payable annually
in March..... \$15,000 00

Your committee would further report that the annual income amounting to \$675.00 has been paid for the year 1896 and placed to the credit of the school department to be applied by them for the support of a grammar school in compliance with the will of the late Moses Brown the donor.

Alderman PHILIP H. BLUMPEY, JR.
Councilman ABRAM A. CRABTREE,
Councilman GEORGE S. CATE,
Committee.

Newburyport, Dec. 31, 1896.

FROTHINGHAM FUND.

*To His Honor the Mayor and Board of Aldermen
of the City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen on Frothingham fund held in trust by the board of aldermen for the benefit of the public library, herewith present their annual report on condition of said fund and disposition made of the income therefrom.

INVESTMENT.

City note at 4 per cent. payable annually in January..... \$1,000 00

INCOME.

Interest at 4 per cent. paid in January..... \$40 00

By order of your committee the above income from the Frothingham fund was paid to the directors of the public library, "to be used for new, useful books for the increase of the library," in accordance with the will of the donor, the late Joseph A. Frothingham.

FRANK H. PLUMER,
MOODY KIMBALL,
WILLIAM C. COFFIN,

Committee.

Newburyport, Dec. 31, 1896.

WILLIAM O. MOSELEY FUND.

*To the Hon. Mayor and Board of Aldermen of the
City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen on William O. Moseley fund held in trust by the board of aldermen of the City of Newburyport for the benefit of the public library respectfully present the following report of the condition of said fund and the disposition of the income accruing thereon.

INVESTMENT.

City of Newburyport note, dated May 1, 1896, at
4 per cent. interest payable semi-annually.... \$10,000 00

INCOME.

Interest payable in May, 1896.....	\$200 00	
Interest payable in Nov., 1896.....	200 00	
		400 00

By order of your committee the above income was paid over to the directors of the public library.

For the application of the income from this fund reference must be had to the annual report of the directors of the public library. In the expenditure of the income from this fund anything for the benefit of the institution is admissible, the donor of the bequest making no limitations.

PHILIP H. BLUMPEY, JR.,	} COMMITTEE.
WILLIAM C. COFFIN,	
HENRY J. NOYES,	

Newburyport, Dec. 31, 1896.

TOPPAN FUND.

*To the Hon. Mayor and Board of Aldermen, of the
City of Newburyport:*

GENTLEMEN:—The standing committee of the board of aldermen on the Toppan fund held in trust by the board of aldermen for the purpose hereinafter stated, would respectfully report as follows, on the condition of fund and disposal of the income therefrom.

INVESTMENT.

City note at 4 per cent., interest payable annually... \$250 00

The income thereof for the year 1896 amounting to sum of \$10 has been paid by order of your committee to the board of school committee to be by them awarded to the member of the senior class of the high school showing the greatest proficiency in the science of government, in accordance with the suggestion of the donor Robert N. Toppan, esq. in a communication addressed to the principal of the high school, dated Cambridge, Mass., Feb. 17, 1887.

WILLIAM C. COFFIN,
MOODY KIMBALL,
FRANK H. PLUMER,
Committee.

Newburyport, Dec. 31, 1896.

PUTNAM FREE SCHOOL FUND.

*To His Honor the Mayor and Board of Aldermen
of the City of Newburyport:*

GENTLEMEN:--The standing committee on Putnam Free School fund, of the board of aldermen, in accordance with the provisions of rule 6 of rules and regulations in relation to trust funds under the control of the mayor and board of aldermen, would respectfully report that it appears from the schedule of investments filed by the treasurer of the board of trustees, John N. Pike, esq., May 1, 1896, that the investments of the fund were as follows.

Notes secured by mortgage.....	\$15,987 82	
Stocks, R. R., Bank and Gas.....	11,184 00	
Bonds.....	23,950 00	
Deposit in Institution for Savings..	700 00	
Deposit in Five Cents Savings Bank	630 00	
	—————	\$52,451 82

No return made of the value of real estate, school buildings, school furniture and apparatus owned by the trustees of the fund.

For further information as to the management of the institution supported by this fund, reference can be had to the report of school committee on consolidated High and Putnam Schools.

HENRY J. NOYES,

Newburyport, December 31, 1896.

TODD FUND.

To his Honor the Mayor and City Council of the City of Newburyport:

GENTLEMEN:—The joint standing committee of the city council on Todd fund, in accordance with the requirements of rule 6 of rules and regulations in relation to trust funds under control of the city council, respectfully report that the Todd fund of \$10,000 the bequest of William C. Todd, esq., is invested in a note of the City of Newburyport at 4 per cent. per annum payable annually to the trustees of the public library, to be by them expended for the benefit of the reading room attached to the public library of the City of Newburyport.

Said income for the year 1896 amounting to \$400 has been paid to the trustees of the public library by order of this committee.

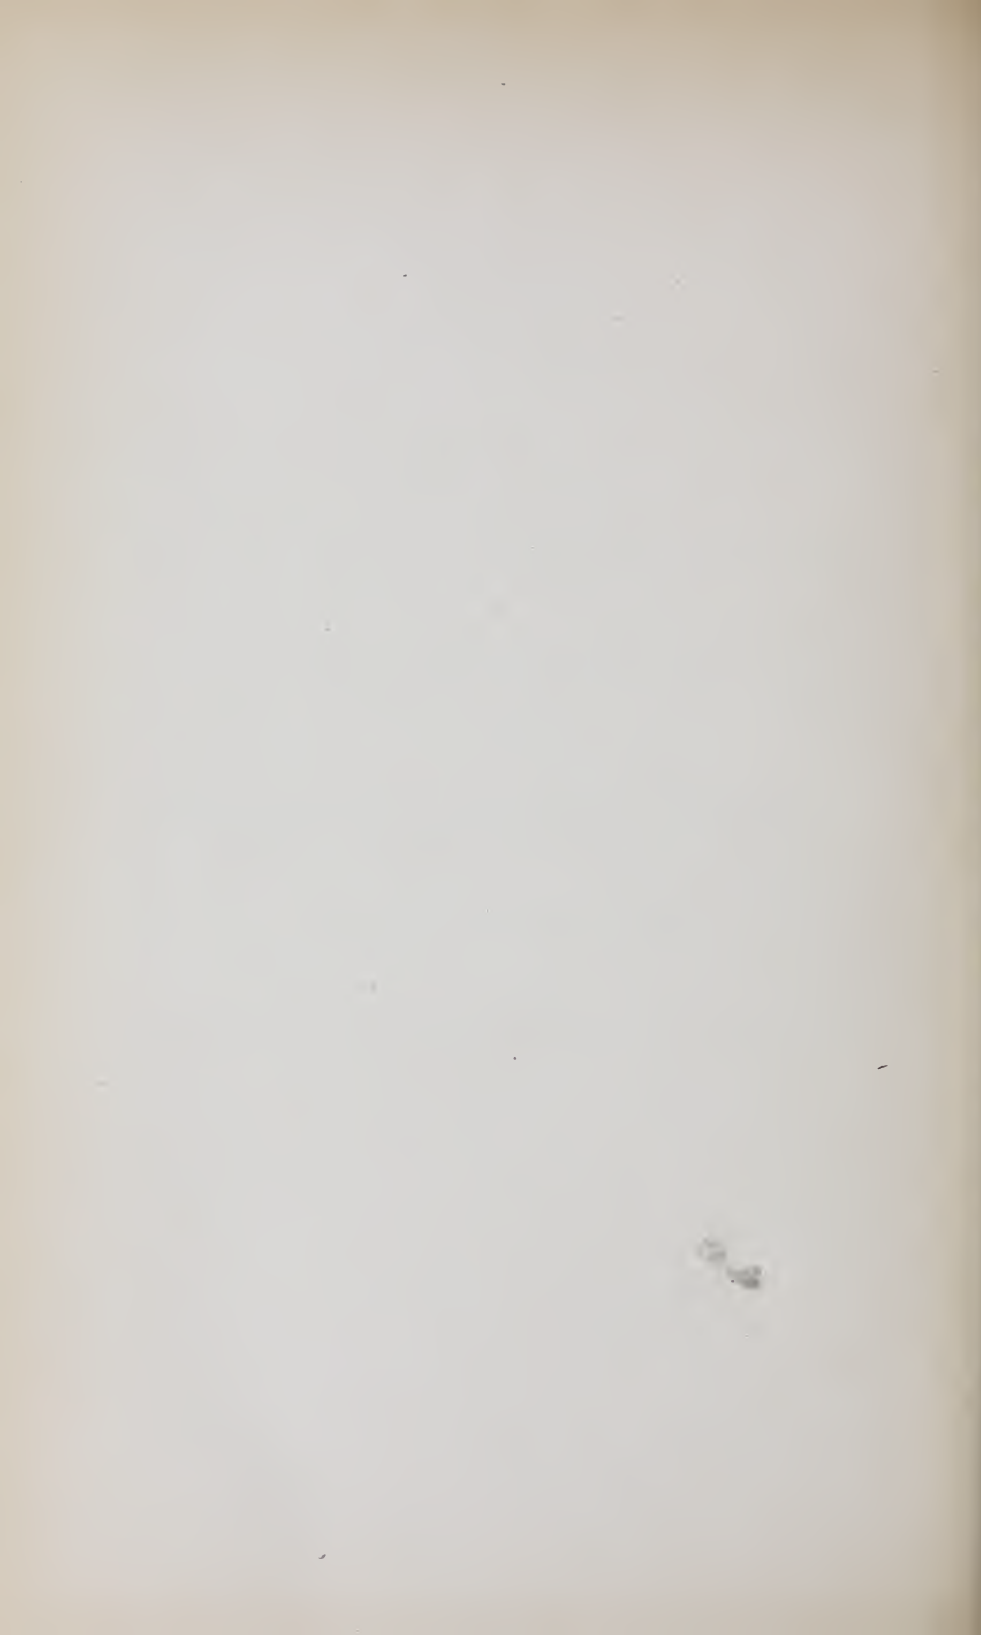

For further information touching the expenditure of said income, reference may be had to the annual report of the directors of the public library for the year ending Dec. 31, 1896.

HENRY J. NOYES,

Chairman.

Newburyport, Dec. 31, 1896.

ANNUAL REPORT
OF THE
CITY REGISTRAR
FOR THE YEAR 1896.

REPORT.

CITY REGISTRAR'S OFFICE, }
March 1, 1897. }

The following statistics relating to births, marriages and deaths in the City of Newburyport for the year ending December 31, 1896 are compiled for information and comparison, and are respectfully submitted.

BIRTHS.

No one pretends to report to this office a birth in their families, and wonder long years after why there is no record on the books of the city.

No effort is spared to make these records as complete as possible, yet there are cases when it is impossible to get all the facts required for record.

The number of children born in the city during the year 1896 and recorded in this office is 331, 23 less than the previous year. Of this number 181 were males, 150 females. Unfortunate year for twins, but one pair reported, males, they lived but a few weeks. All white with a single exception. Four returned as illegitimate.

Births occurred by months and quarters as follows :

First Quar.	Second Quar.	Third Quar.	Fourth Quar.
January.. .23	April.....31	July 21	October 26
February ..32	May 24	August....24	November ..30
March....,36	June.....26	Sept.....28	December...30
91	81	73	86

NATIVITY OF PARENTS.

	Fathers.	Mothers.
Born in the United States.....	206	200
“ “ “ Provinces.....	48	58
“ “ Ireland.....	55	60
“ “ other foreign countries.....	17	11
Unknown.....	5	2
	331	331

Of 53 children born, both parents returned as natives of Newburyport; of 67 the fathers only were returned as natives of Newburyport, and of 49 the mothers only were so returned.

MARRIAGES.

The number of intentions filed and certificates issued 121, all returned for record except two, the marriages having been solemnized in this city or elsewhere.

The number of marriages recorded for 1896 was 138, 23 less than last year. 118 married in this city, 20 in other places.

Marriages in each month and quarter as follows :

First Quar.	Second Quar.	Third Quar.	Fourth Quar.
January.. .13	April.....15	July.....9	October....16
February. .9	May.....4	August....5	November ..20
March.....8	June.....17	September .8	December...14
30	36	22	50

Marriages were solemnized by the following clergymen and officials:

Congregationalist..	Albert W. Hitchcock.....	10
	Charles P. Mills.....	14
	John H. Reid.....	12
	Daniel T. Fiske.....	3
	Myron O. Patton.....	1
Presbyterian....	Horace C. Hovey.....	6
	T. James Macfaddin.....	6
Unitarian.....	Samuel C. Beane.....	5
Baptist.....	Louis A. Pope.....	12
Episcopal.....	William C. Richardson.....	9
Methodist.....	John W. Ward.....	7
	James H. Stubbs.....	3
	Alexander Dixon.....	1
Jewish Rabbi	R. D. Greenburg.....	3
Advent.....	John Pearson.....	1
	W. S. Bezanson.....	1
Roman Catholic...	William H. Ryan.....	14
	J. B. Lavessier.....	9
Justice of the Peace	E. F. Bartlett.....	1
Non-resident Clergymen.....		18
Non-resident Justice of the Peace		1

Average age of groom, 29.28 years; average age of brides, 24.9 years; the oldest couple married, the groom 72 years, the bride 65 years, it being the second marriage of the groom and third marriage of the bride; the youngest couple, the groom 19 and the bride 17 years; there were 9 grooms under age—2 at 18 years, 3 at 19 years and 4 at 20 years; 6 brides under age—1 at 16 years and 5 at 17 years. First marriage of 118 grooms and 124 brides; second marriage of 17 grooms and 13 brides; the third marriage of three grooms and one bride.

Only one couple where both were under age. Of 29 couples the brides were older than the groom, and 11 couples ages returned as the same.

DEATHS.

Deaths occurring in this city during the year 1896, not including stillbirths, was 253, twenty-one less than last year.

The number recorded for the year including 14 stillbirths, 355. Of this number 88 occurred in other places and were brought to this city for interment, or as in the case of the seamen drowned off Plum Island in Newbury and Salisbury beach in Salisbury and removed to this city by order of the medical examiner, deaths are recorded here though in some cases the interment was in another place.

Interments in this city always exceed the deaths—this year 26—more brought from other places than were removed by that number. Of those removed 24 were interred in Newbury (Old-town) and two in West Newbury.

Deaths by months and quarters:

First Quarter.	Second Quarter.	Third Quarter.	Fourth Quarter.
Jan.....10	April....26	July.....27	Oct.....24
Feb.....25	May 26	Aug.....21	Nov 20
Mar 28	June 17	Sept 19	Dec.....24
63	69	67	68

The number of deaths from zymotic diseases, 16, two more than last year. Typhoid fever, 8; croup, 4; diphtheria, 2; measles, 2.

Deaths from heart disease, so called, takes first place, 21; taking the place so long held by consumption, and perhaps for the same reason. Old age next, 18; cancer and consumption, each 16; paralysis, 14; pneumonia, 12; apoplexy, 10.

Deaths from all causes (not including stillbirths,) under ten years of age, 73; deaths 60 years old and upwards, 99; and of this latter number five were over 90 years of age.

Average age, 41.9 years. Further information can be had by reference to tabulated list hereto annexed.

GEORGE H. STEVENS,

Registrar.

ANNUAL REPORT
OF THE
SUPERINTENDENT OF SEWERS
1896.

REPORT.

*To the Joint Standing Committee on Sewerage,
City of Newburyport:*

GENTLEMEN:— Subjoined please receive the principal doings of the department you committed to me for 1896:

There have been laid out, graded, and personally directed, ninety-four (94) separate drains, and the connection to the public sewer well done. Plumbers have been furnished with advice as to preliminary location, in view of contracts. The records in the register kept for that purpose, are before you.

Certain appearances in the book need explanation. The twelve or fourteen lines on page 25 are all the record left to me by my predecessor of the work of 1895, except a pencil mark at part of the Y's in the location books, and sundry loose and not accurate papers backed in pencil. It was not creditable to skip a page already properly begun, (24) and enter my doings on the next leaf. From the rough memo-

randa, and by inquiry and investigation I have composed the best record I can, cancelling page 25 by a foot note; and it is hoped to be fairly correct and satisfactory. Seventy Y's or more were unmarked; over twenty of these could be proved, where I laid the drains, and I hope by calling up the plumbers to help me measure the ground over, to supply this very essential information in its place. I shall feel well paid for this, which involves many days and walks, if you will, as you may, remove the claim that a superintendent should pay the necessary carting for tools to work with.

It was arranged and ordered to build a sewer in Coffin's Court, and consideration showed that it would be bad engineering to follow the present grade of the court, which is very sharp at the top. The work was therefore laid out so as to allow a good cut from the high ridge, and have the sewer fit to be extended three or four hundred feet when the court shall be extended so as to open some very desirable house lots in the rear land. Hence the manhole at the head was made about 15 feet deep. The work was begun June 15, and finished in good shape June 21, 316 feet long.

Pipe was on hand worth.....	\$ 46 80	
Construction cost.....	197 94	
Totat cost of the sewer and manhole.....		\$244 74

The balance of six-inch pipe on hand has been sold to the water commission at about cost, and cash credited to Sewer Construction Account.

The ninety-four drains laid this year drained:

Allen street.....5	Fruit street.....2	Milk street.....7
Atwood " 2	Green " 3	Parsons " 2
Beck " 1	Hancock " 2	Pond " 4
Birch " 8	Harris " 2	Prospect " 4
Boardman" 3	Harrison " 1	Purchase" 3
Broad " 5	High " 12	Ship " 2
Bromfield" 2	Kent " 2	State " 19
Buck " 1	Liberty " 3	Spring " 4
Carter " 1	Lime " 4	Strong " 2
Charles " 2	Lunt " 2	Summer " 9
Charter " 2	Market " 7	Temple " 2
Coffin's Ct. 3	Marlboro" 2	Unicorn " 2
Dove street 2	Merrill " 1	Vernon " 2
Fair " 2	Merrimac" 6	Washington st. . .3
Federal " 2	Middle " 1	Water street 5

Separate establishments or tenements, total 162, thus classified:

8 stores, total in sewer.....	132
6 halls, including schools, total in sewer.....	50
136 tenements, total in sewer.....	1,060
1 hotel and boarding house, total in sewer....	23
10 shops, offices and factories, " " "	105

Total users of sewers.....1,370

Other work especially noted:

Perambulation by the committee, at the opening of spring inspection, interest flagged after main sewer above Market square was viewed, and only the chair-

man made the complete round back to State street, Alderman Coffin being a close second. Councilman Perkins did the work for the south end. What you saw needs no report.

April 3 a bad stoppage showed in Franklin street, requiring very hard labor of one man boring, the first soft spot reached at 172 feet, shortly after which the whole matter filling 400 feet of sewer and two manholes passed out and was washed away, probably a year's collection. This sewer had been untouched by care for twenty months.

February 29 a small obstruction in Liberty street required 148 feet of rods to tap it, and one-half day's work to clear.

May 6, stoppage on Strong street, tapped by 280 feet of rods. Had been flowing up hill into Atkinson street, and over the summit into Boardman street without discovery.

May 7 to 16, entire emptying of dirt pans and clearing of collections, one of the worst being found in Ship street; when 180 feet sewer and one manhole were full, until relieved by tapping with a 70 foot rod and chisel. June 23, Temple street was plugged up by sand from J. M. Greenough's stable floor, the hardest stoppage ever found since sewer was in use. Two days two men tried to open it, 162 feet

rods at last started the trouble. A neglected settling cistern the cause; outlet raised one foot and made more safe, no trouble since.

Further details are needless, it suffices to show that a neglected system will soon be a useless one.

The sewers are now in good working condition everywhere; there is no up hill sewer, in spite of the repeated statement. The slow one above Boardman was built for the whole sixth and seventh wards, 50 years hence, and not for the fifth, a ten inch would answer for that, and 21 houses cannot be expected to run a sewer of a slow grade of five times the size needed. It will come all right with time and proper care, and small cost for that.

Cost since I took charge, maintenance \$88.95. The balance of our account is a lay-over from 1895. We shall leave no such amount to lay-over.

Respectfully submitted,

F. CURTIS,

Superintendent.

December 31, 1896.

ANNUAL REPORT
OF THE
BOARD OF HEALTH
OF THE
CITY OF NEWBURYPORT
FOR THE YEAR 1896.

REPORT.

*To His Hon. the Mayor and Board of Aldermen of
the City of Newburyport:*

GENTLEMEN:—The Board of Health herewith submits its twenty-first annual report, for the year ending Dec. 31, 1896:

Appropriation	\$1,000 00
Credits	12 10
	\$1,012 10
Amount undrawn.....	62 32
	\$ 949 78

EXPENDITURES.

Nathaniel Ireland, groceries.....	\$ 14 84
Thomas Noyes & Sons, groceries.....	8 44
M. C. Adams, provisions.....	15 96
George W. Knight, salary as agent and cash paid	219 20
C. M. Lunt & Sons, removal of house offal	322 75
Wm. H. Lawrence, services as inspector of plumbing.....	174 00
T. N. Cook, milk.....	1 80
<i>Amounts carried forward.....</i>	<i>\$756 99 \$949 78</i>

<i>Amounts brought forward.....</i>	\$756 99	\$949 78
T. A. Moynihan, milk	1 40

George J. Ross, special officer on diph- theria case.....	20 25	
Moses P. Towne, special officer on diph- theria case.....	20 25	
		<u>\$949 78</u>

WORK OF THE AGENT.

George W. Knight, agent of the board, makes the following report:

Complaints attended to.....	146
Nuisances abated	95
Cesspools	46
Closets	83
Neglect and stealing swill.....	77
Dead animals removed	41
Cruelty to animals	3
Sick animals attended.....	21
Houses placarded.....	5
“ fumigated	18
Rooms “	74
Carriages “	1

REMOVAL OF NIGHT SOIL AND CONTENTS CESS- POOLS.

The amount of work done by C. M. Lunt & Sons is as follows:

January.....	43 loads.
February.....	6 “
March.....	31 “
April.....	62 “
May.....	86 “
June.....	83 “
July.....	72 “
August.....	89 “
September....	59 “
October.....	51 “
November.....	80 “
December.....	28 “
—690 loads.	

The board would recommend, as they do not desire to force the citizens to enter the sewer, a discontinuance of all privys and cesspools for the public good, and the better protection of the sanitary condition of the city. The contract for removing house offal was awarded to Jeremiah Sweeney, for one year ending June 1, 1897.

REPORT OF INSPECTOR OF PLUMBING.

Mr. William H. Lawrence, inspector of plumbing, reports the number of inspections for the year 1896 as 151, connections to sewer, 99; additions and connections to cesspools, 52..

JOHN E. BAILEY,
CLARENCE C. DAY,
ARTHUR WITHINGTON.

BOARD OF HEALTH RULES FOR PLUMBING.

Unless the Board of Health shall authorize variation by special permit, on request of the owner, the drainage system of a hotel, tenement house, dwelling house, stable with sleeping apartments, factory, shop or other buildings in the city of Newburyport, shall be constructed according to the following rules for plumbing:

SECTION 1. *Inspector.* The board of health shall annually appoint an inspector of plumbing, to whom suitable compensation shall be allowed.

SECT. 2. *Plumbers.* No person shall carry on the business of plumbing unless he shall have first registered his name and place of business in the office of the board of health. Notice of any change in the place of business of a registered plumber shall be immediately given to the inspector of plumbing.

SECT. 3. *Filing Plans and Specifications.* No person shall proceed to construct, add to or alter any portion of the drainage system of said buildings (except to repair leaks) until a notice of the work to be performed has been filed with the inspector of plumbing, upon blanks in such form as the board of health shall order. No person shall commence work upon such drainage or plumbing until the plans are approved by the board of health. Plans and specifications will be approved or rejected within five days of the time of filing. After a plan has once been approved no alterations of the same will be allowed, except on a written application of the owner.

SECT. 4. Pipes and other fixtures shall not be covered or concealed from view until approved by the inspector, who shall examine the same within two working days after notice that they are ready for inspection.

SECT. 5. Plumbing work shall not be used unless the same

has been tested in the presence and under direction of the inspector, with the water test, or if required by him, with the peppermint or other reliable test, and approved by the board in writing.

SECT. 6. *Main Drain.* Every building herein referred to shall have separate and independent drainage into a common sewer, or cesspool where sewers are not accessible. There shall be uninterrupted circulation of air through the drain pipe, from the fresh air inlet near the main trap, to a point two feet above the roof, and at least ten feet from any window. In the basement wall and for five feet beyond it drain shall be of extra heavy 4 inch cast iron soil pipe. Within the building or basement, it must be of sound cast iron with strong iron supports from floor timbers, or secure fastenings to cellar walls;—must have slope of $\frac{1}{2}$ inch to the foot, if possible—never less than $\frac{1}{4}$ inch to the foot, and if beneath the cellar floor must be in a walled trench with movable covers, unless it be of extra heavy pipe with perfect lead joints tested by 20 feet head of water or more, in which case the inspector may give permission to cover it with not over one foot of earth.

SECT. 7. *Traps.* The main drain must have a 4-inch trap close to the foundation wall, with a suitable clean-out plug. A suitable grease trap, approved by the board of health, shall be placed where directed by the inspector of plumbing, in every hotel, eating house, restaurant, or other public cooking establishment in such a manner as to be easily accessible for inspection and cleaning. Outside grease traps where used may be of masonry or earthenware, safe from frost. Water closet traps shall be actually close to the closet; all other waste pipes shall be trapped within thirty inches of the fixture it serves.

SECT. 8. Waste pipes from water closets shall be cast iron 4 inches in diameter, rising of undiminished size two feet above the roof, or six inches above the ridge, open at top and clear of all windows. From sinks, basins, bath tubs, wash tubs, etc., they shall be of cast iron when two inches or more in diameter, and of lead when less than two inches.

SECT. 9. *Fresh Air Inlets.* There must be a fresh air inlet pipe entering the drain on the house side of the main trap, of not less than four (4) inches, internal diameter, extending therefrom to the external air, away from all windows and cold air box of the furnace and protected from dirt and obstruction.

SECT. 10. *Connections.* All connections with horizontal pipes shall be made by one-eighth ($\frac{1}{8}$) bends and Y branches, and all changes in direction shall be by curved pipe. No trap shall be placed at the foot of a vertical soil pipe.

SECT. 11. *Drip or Overflow Pipes.* Drip or overflow pipes under water closets, or other fixtures, or from tanks or cisterns, shall in no case be connected directly with house sewers. Sediment blow off, steam exhaust pipes for boilers, shall in no case be connected with sewers directly or indirectly.

SECT. 12. *Refrigerator Wastes.* No waste pipe from a refrigerator, or other receptacle in which food or provisions are stored, shall be connected with a drain soil or other waste pipe, but must be separated therefrom by an open sink or tray, furnished with a trap.

SECT. 13. *Ventilation of Trap.* All traps must be furnished with a vent pipe, run from the crown of the trap, but the highest closet trap in a system if within twelve (12) inches of a vertical stand pipe may be excepted. The vent pipe from a water closet trap must be at least two (2) inches in diameter; other vent pipes must be as large as the waste pipe from the trap. All ventilation pipes from a soil or waste pipe must be run of undiminished size, separately or combined together, to the roof, and carried up at least four (4) inches internal diameter, through the roof, and at least two (2) feet above it, and left open, or may be run into a soil pipe above all connections. In no case shall a soil, waste or ventilation pipe, from a soil or waste pipe be connected with a chimney. No brick, earthenware or sheet metal pipes shall be used for ventilation pipes from a soil or a waste pipe.

SECT. 14. *Cast Iron Pipes.* All cast iron pipes must be

free from holes and other defects, of a uniform thickness of not less than one-eighth ($\frac{1}{8}$) inch, for a diameter of four (4) inches or less.

INTERNAL DIAMETER	ORDINARY PIPE	EXTRA HEAVY PIPE
<i>Inches.</i>	<i>Lbs. per foot.</i>	<i>Lbs. per foot.</i>
2	3½	5½
3	4½	9½
4	6½	13

And before being connected shall be thoroughly coated, inside and out, with coal tar pitch, applied hot by immersion, or some equivalent substance satisfactory to the board of health.

SECT. 15. *Joints.* Connections between lead and iron pipes shall be made with brass ferrules, full size of the iron pipe calked into the iron pipe with soft lead, and united to the lead pipe with a wiped joint. Lead pipes may be connected with a water closet only by a solid brass flange one-quarter of an inch thick, strongly soldered to the lead, and clamped to the closet with proper packing. All joints in the cast iron pipe and fittings must be so filled with oakum and soft lead as to make a tight joint and no putty or red lead used. There shall be at least 12 ounces of soft lead used to each inch diameter of pipe.

SECT. 16. *Water Closet Supplies.* No water closet shall be supplied directly from the house supply pipe, or tank, nor shall receive any overflow or waste from the same, but shall be supplied from a special water tank or cistern used for no other purpose, and the flooding pipe shall not be less than one and one-quarter ($1\frac{1}{4}$) inch in diameter.

SECT. 17. *Traps, Vents and Back Air Pipes.* No trap, vent or back air pipe shall be used as a soil wash or conductor pipe. Lead air pipes may be used only where exposed to view. If air pipes to any water closet shall exceed thirty feet in length,

the excess shall not be less than three inches in diameter. All air pipes shall be run as directly as possible.

SECT. 18. No tank or cistern excepting that supplying the water closet, shall be placed in the water closet room unless absolutely necessary.

SECT. 19. Whoever violates any provisions of these rules is liable to a fine not exceeding \$100. [Public Statutes, Chapter 80, Section 18.]

Adopted.

IN BOARD OF HEALTH, March 15, 1895.

Attest,

AMOS H. GEARY,

Clerk.

JOHN E. BAILEY,

Chairman.

ANNUAL REPORT

OF THE

SURVEYOR OF HIGHWAYS

FOR THE YEAR 1896.

REPORT.

NEWBURYPORT, Dec. 3, 1896.

To his Honor the Mayor and Committee on Highways:

GENTLEMEN:—In submitting this report to your honorable body of which I am your representative, having the expenditure of the money appropriated for this department, it is with a certain feeling that what has been done this year will add to the credit of what has been done during previous years. And as the year's work was started with the impression that this department was to receive a certain amount in addition to what was appropriated, and that failing to mature, and the amount being expended when we reached Lime street going down Prospect, this department was brought to a standstill for the year, leaving Prospect from Lime to Bromfield, High street from Bromfield to Marlborough, Green street,

also, Washington from Olive to Kent street, to be done another year.

Much comment has been made on the localities where the work was performed, but no one unprejudiced can truly say that they did not need what they received.

In conclusion of these remarks to your honorable body, my sincere thanks are extended to his honor the mayor and gentlemen of the committee, city clerk, police, and all others who by their courtesy have helped in the discharge of the duties of the surveyor of highways.

Yours with respect,

CHARLES M. PRITCHARD,

Surveyor of Highways.

EXPENDITURES.

Bought and used during the year, 3817	
tons crushed stone at \$1.30 per ton	
gross, \$1.15 net.....\$	4,831 44

REPORT OF THE DIRECTORS.

To His Honor the Mayor and City Council:

The directors of the public library submit their forty-first annual report, and for the details would refer you to the report of the librarian and the statements of the officials having charge of the several funds.

The library has been of increasing usefulness to the people of the city, and this has been appreciated by the public and by the city government which this year made an appropriation, which will greatly increase its value as a library and storehouse of knowledge. Heretofore it has been a mass of books, large, and pretty well selected considering the number and wealth of the community using it, and from which the reader might procure good books if he happened to know that they were there or could find them after searching the annual additions of many years. But such a mass of books is not a proper

library from which one can readily find all the sources of knowledge it contains upon any subject of investigation. Such a library ours will be when the work so happily begun shall have been completed, if the city shall make the appropriation suggested in the librarian's report. This work of classification with the card catalogue will add more to the real value of the library than would the expenditure of several times the cost in books.

We would call attention also to another suggestion of the librarian, which is the rendering accessible to the public the books of reference. This subject was considered by the book committee in the early part of the present year. The committee decided upon what seemed to them the best plan, one convenient to those who should desire to consult the books of reference in the library, and with the least danger of damage or depredation as regards the books. But this plan involved the expenditure of about thirty-five dollars and the committee had no funds for the purpose under their control. In return for the expenditure of this small sum a very material gain to the users of the public library could be secured. It can easily be seen how much more convenient such an arrangement would be in the use made of the few books of reference upon the desks in that part of the Simpson Annex which is open to the public.

We have a large and well selected library for its purpose. Compared with libraries of cities of its population and wealth, or even with many much larger and richer, the Newburyport Public Library is a noble institution, and it should be our endeavor to extend its usefulness to the greatest possible degree. We have done much in this direction the past year. Let us endeavor to do as much in the coming year by completing the arrangement of the books and the card catalogue, and by giving free access to the reference books so that all who wish to consult them shall find no hinderance.

REPORT OF THE LIBRARIAN.

To the Book Committee:

GENTLEMEN:—This is the 41st annual report of the librarian, showing the state of the public library on November 30, 1896, the close of the library year.

A year ago the number of books on the shelves was 30,889. Since that date there have been added 883 volumes, and 57 have been canceled, 39 of which were not deemed worthy of replacing. There have been lost or are missing 15 volumes. In most of these cases demand by mail addressed to the parties charged with these books are returned endorsed "Can't be found." Nor is the police department any more successful in tracing them, the inference being that they have removed from town. In some instances, as not infrequently happens, books may have been misplaced on the shelves and will later be accounted for in the work of reclassifying. The total number Nov. 30 is thus, 31,731.

The number of books withdrawn during the 11 months that the library was open for that purpose was 38,561. This is a slight falling off from the previous year, 269 copies, but is 2,812 in excess of the average of the six years from 1890 to 1895 inclusive.

The largest per centage of books drawn from the library is that of fiction and juvenile literature, amounting to 74.22 of the whole, or a trifle less than three-quarters. This, however, it may be stated, is somewhat below the average of libraries of the class to which this one belongs. To test the matter I selected the reports of three Essex county libraries at random, and found that their average circulation of this class of literature was 79. As a further test I then took three other reports from institutions widely separated, and obtained the same result, 79. It has come to be accepted as a fact that about three-quarters of the calls for books in popular libraries will be of this order.

There is an element of fallacy, however, in reaching this gauge of public demand, which it is well not to overlook. This lies in the fact that fiction is read more rapidly and turned over more frequently than other literature. To illustrate: it is not extravagant to estimate that a novel reader might devour two

books a week. This means that in 50 weeks such a book a popular story might be taken out 100 times. The reader of another class might require his volume for two weeks. In that case the book could circulate but 25 times in 50 weeks. Multiply by 100 and in the one case the 100 novels would return a circulation of 10,000, or 80 per cent of the whole, the others of 2,500, or 20 per cent, yet in both instances the number of persons using each class has been the same.

During the year 540 new borrowers have qualified, the names of 107 have been erased, leaving the present number of card holders 5700, an increase from 5160 of last year and 4606 of two years ago. In addition to the above 30 teachers in the public schools hold 150 special cards, and 66 High school pupils each a pupil's card, making a total of 5916 accounts.

The library has been open for the withdrawal of books 287 days, and the average circulation has been a fraction above 134, the average for the five previous years having been 126.

After an agitation and discussion of ways and means covering several years, the systematic classification of the books in the library and the preparation of a permanent catalogue is at length well under way. The difficulty was solved by the city council

of the present year making a special appropriation of \$1000 for carrying on the work.

Early in the season the book committee and librarian appeared before the city council committee on finance, presented their case, and asked for an appropriation of \$1500. This sum was based on figures presented for a special cataloguer's salary, for printing a fiction finding-list and on the cost of the cards and furnishings which would be required, all for one year.

The committee decided to recommend that \$1000 be appropriated. By a combination of circumstances that amount proved ample. A cataloguer in every way competent was secured at a less salary than was at first anticipated would be necessary, and the year had nearly one half passed before the work could be started. Consequently the expenditures for this work have so far amounted to but \$630.35, leaving unexpended at the close of the year about \$350. To carry the work through next year will require \$1050, or \$700 over and above what the city signified its willingness to appropriate for one year. This will provide one full year's salary for the cataloguer, for a second cabinet for the card catalogue, the last which will be needed, for printing the fiction catalogue, and leave a small margin for minor contingencies.

As already stated the work of classifying and cataloguing began on May 1, 1896. By Sept. 1, all the works of fiction in the library, as well as books dealing especially with New England history and genealogy, had been collected, classified, labelled and arranged in position, and the cards written and ready for the public.

In the fiction class, there are 2638 works in 3429 volumes, and in New England history 654 works in 1,042 volumes. This represents over 14 per cent of the entire library, accomplished in less than four months, while other work was done meanwhile which will not have to be taken up again.

To immediately bring these subjects into use necessitated handling every book in the library in order to separate them from the lot. If another subject was taken up in that way, natural science for instance, all the books in the library not already classified would have to be gone over again, and so on as each class was arranged, until all were eliminated. Having provided for those classes most frequently called for it was deemed best to proceed on different lines, and since September the work has been going on in a manner which, while it does not seem to give such rapid results is really more expeditious. The volumes are now being first classified, the assigned num-

ber being written on the book-plate and shelf list slips written and arranged alphabetically. So far 7033 volumes, in addition to those enumerated above, have been classified. Three months is the estimated time required for completing this branch of the work, with the exceptions to be noted.

To catalogue these books, write the various cards and arrange them as well as to arrange the books as fast as the classes are completed will take, it is estimated 14 months additional time.

The exceptions noted above relate to government publications. The publications of the government are so multifarious that not many years will have elapsed before a collection of these alone will constitute a mammoth library. They are in the main bulky and demand much shelf space, and as the most of them in a library of this sort are seldom or never consulted, they become so much useless lumber in the course of time.

Of course some of these books are of practical service and are extremely valuable. Such, it would be well to separate from the rest, and give their proper classification. What disposition to make of the others, in short where to draw the line might be made a subject of special consideration. As in each county the government selects one library as a spe-

cial depository where all its publications are put, it never would be difficult to obtain the use of any particular volume that might be called for.

The figures of circulation as given in another part of this report only partially tell of the service the library is affording the public. Of the number of books consulted in the building it is not possible to give the figures. The department of New England history and genealogy especially is in constant use. Of course dictionaries and cyclopedias are in great demand, to say nothing of miscellaneous volumes of all kinds. The work of the library would be broadened if some method could obtain whereby the public might have free access to these classes of books, and in that connection I renew my recommendation of a year ago.

JOHN D. PARSONS,
Librarian.

APPENDIX B.—PEABODY FUND.

Nearly thirty years ago, Mr. George Peabody wishing, as he expressed himself, to mark his memory of the kindness shown to him in early youth while in Newburyport, and of the pleasant relations which have ever since existed with some of its citizens and himself, after inquiry as to what would be most beneficial decided to give \$15,000 to increase the scope and usefulness of the Public Library.

I had the honor of receiving the money and being appointed the treasurer of the fund and have ever since acted in that capacity and as one of the trustees, and it is sad to accord that all who acted with me in that capacity have exchanged worlds,—Caleb Cushing, Henry C. Perkins, Eben F. Stone and Joshua Hale.

The only absolute condition attached to the generous gift of Mr. Peabody was, that an annual report of the condition of the fund and the amount of income derived therefrom should be prepared and published. In accordance, therefore, with Mr. Peabody's request, I hereby give notice, that the original sum of \$15,000 was forthwith deposited in the Institution for Savings, where it has ever since remained, the principal to be withdrawn only upon the signature of a majority of the board of trustees of the fund. The income the past year has been six hundred dollars; 196 volumes have been added during the year, and in all 7954 previously.

EDW. S. MOSELEY, Treasurer.

The condition of the fund, both the receipts and expenditures, on account, has been duly audited and certified to as correct of the fund.

E. S. MOSELEY,
BENJ. HALE,
W. H. SWASEY,
JOHN J. CURRIER,
L. B. CUSHING.

APPENDIX C.—BUILDING FUND.

The building fund, being the excess remaining unexpended after the present library building was purchased and provided with the necessary conveniences to render it serviceable, amounting to nearly \$5,000, was immediately deposited in the Institution for Savings, where it has ever since remained, the principal only subject to withdrawal upon the order of all the members of the board of trustees.

It will be remembered that this sum arises from the excess over and above the amount subscribed by those interested in the city after the expenditure for the object above named, since which \$4,333.13 has been drawn on account of various repairs and other needed expenses, thereby saving so much to the city treasury, notwithstanding which at the present time the whole amount to the credit of the fund in the Institution for Savings consists of \$6,131.00.

The accounts of receipts and expenditures have been yearly audited, and their correctness certified to on file.

EDWARD S. MOSELEY, Treasurer.

E. P. DODGE,

L. B. CUSHING.

Newburyport, Dec. 14, 1896.

APPENDIX D.—W. O. MOSELEY FUND.

A new fund for the purchase of books has been made available through the generosity of the late Wm. O. Moseley, whose executors early in 1895 paid into the city treasury the sum of \$10,000, for the benefit of the public library. The fund, which began declaring interest one year ago, will in the future yield \$200 semi-annually. There have been purchased under its provisions during the year past 221 volumes, at a cost of \$345.21 and the November semi-annual interest \$200 is still available.

STATEMENT.

RECEITS.

EXPENDED.

1896.	Purchased 221 books at	\$345.21	345 21
			<u> </u>
Balance on hand.....			\$254 79

APPENDIX E.—TODD FUND.

The city annually allows an income of \$400 from the donation of \$10,000 made to it by Hon. William C. Todd for the maintenance of the free reading room. With this sum there are subscribed for 22 daily newspapers, 50 semi-weekly, weekly and monthly newspapers and periodicals, 35 domestic magazines and quarterlies and 16 of foreign publication, a total of 123 publications, while over a score of others are received as donations. The amount expended for publications since the last report is \$395.25, for holders \$3.00, making a total of \$398.25.

MINOR FUNDS.

There have also been purchased from the 'Sawyer' fund income 94 books at a cost of \$103.24, and from the minor funds 37 volumes, including an encyclopædia, at a total of \$122.35.

APPENDIX F.—LIBRARY INCREASE.

No. of volumes last reported	30,830	
Added by purchase 1896:		
Peabody fund.....	196	
W. O. Moseley fund.....	221	
Todd fund.....	128	
Sawyer fund	94	
S. A. Green fund.....	14	
Williams fund.....	10	
Frothingham fund	8	
Bradbury fund.....	5	
	<u>676</u>	
Added by donations.....	201	
Total new vols	877	877
		<u>31,707</u>
Withdrawn (worn out).....	57	
Lost or missing.....	15	
	<u>72</u>	
Total Nov. 30, 1896.....		31,635

The new volumes are classified as follows: General works, 18; philosophy, 12; theology, 20; social science, 61; philology, 11; natural science, 24; useful and fine arts, 31; general literature, (poetry, drama, oratory, letters) 134; fiction, 224; history, 84; travel, adventure, descriptive, 37; biography, 69; documents and government publications, 152.

APPENDIX G.—CIRCULATION.

During the year ending Nov. 30, 1896, there were withdrawn from the library for home use 38,561 books, by months as follows: Dec. (1895) 3,492, Jan. 4,096, Feb. 4,007, March 4,446, April 3,691, May 3,052, June 3,117, July 2,743, Aug. 1,58. These volumes are classified and compared with previous years, as follows:

	1896	1895	1894	1893	1892	1891	1890
Fiction { Adult ... }	28,602	20,909	20,439	19,524	18,768	18,921	17,349
{ Juvenile.. }	7,669	7,669	8,308	8,014	6,692	6,547	4,634
Travels	2,453	1,886	2,164	1,970	1,682	2,071	2,508
Mis. literature....	1,898	2,345	2,202	2,203	2,032	2,087	2,094
History	1,839	1,789	1,666	1,333	1,340	1,506	1,808
Biography	1,253	1,607	1,168	1,078	1,134	1,421	1,317
Nat. science,use- ful and fine arts }	1,067	1,260	1,416	1,040	1,088	876	934
Magazines	588	420	334	461	482	515	402
Philos. and so- cial science .. }	535	521	467	325	320	271	343
Theology	326	424	401	265	376	431	339
	<u>38,561</u>	<u>38,830</u>	<u>38,565</u>	<u>36,213</u>	<u>33,914</u>	<u>34,646</u>	<u>31,727</u>

The percentage of classes to circulation was as follows: Fiction (adult English, foreign and juvenile) 74.22; Travel and descriptive, 6.16; Miscellaneous literature, 5; history, 4.87; biography, 3.27; natural science, useful and fine arts, 2.87; magazines, 1.62; philosophy and sociology, 1.47; theology, 52.

Office, No. 2 Bartlet Street.

REPORT OF THE WATER COMMISSIONERS

To His Honor the Mayor, the Board of Aldermen, and the Common Council of the City of Newburyport,

GENTLEMEN: Although the Act of the Legislature constituting the Board of Water Commissioners for the City of Newburyport, (Chap. 471, Acts of 1893) made no provision requiring a report from this board to the city government, the commissioners have deemed it advisable, at the close of the first full financial year of the city since the water works have been under their supervision, to transmit to your boards a full account of the income received from water furnished to Dec. 1, 1896, of the improvements which it has been deemed essential to make in the water plant, its present condition, with some suggestions as to further desirable changes contemplated in the future, in order to bring the works to the standard of excellence which will be satisfactory to our citizens.

The works in question were deeded to the city in February, 1895. As to the condition of the water

supply with its accessories at that time, the public are well informed. The first duty of the commissioners was to secure a suitable office and work-shop. This they found in their present quarters, of which they took a lease for five years, thus being provided with a roomy work shop, a basement for storage, a room for the meetings of the commissioners, and a small though convenient office.

As soon as the weather permitted after taking possession, all pipes and connections between the pond, pumps, and Merrimac river were removed, thus making the pumping of river water an impossibility. The next important work was on the standpipe which had never been cleaned. A relief valve was placed at the pumping station, a twelve-inch gate at the stand-pipe, and thus the standpipe was emptied, the city being supplied by direct pumping for four days. The standpipe was found to be in a very filthy condition and some thirty loads of mud, etc., were removed from it. Engineer Blake made a thorough examination of the standpipe, drilling in several places to ascertain the thickness, finding many sheets to be not over $\frac{3}{16}$ ths of an inch. The necessity of a new standpipe was so apparent that no repairs have been attempted.

At the basin or pond the water was far from being satisfactory. In the wells the quality was excellent,

but the quantity was not sufficient to supply the demands of the city. Even with the supply of water from the pond it was necessary to resort to the Jackman springs.

Some repairs that were imperative were made on the small pumps, and in April, 1895, continuous pumping was inaugurated, since which time the standpipe has been practically full, with no diminution of pressure during the night. The pipes were flushed and everything possible done to improve the quality of the water in the basin, but the commissioners were soon satisfied that nothing short of a new basin, properly constructed, would be a complete remedy, but owing to an empty treasury they could do nothing in that direction during the year 1895.

It also became evident that the city should own the entire water shed in that locality, and with that end in view measures were taken to secure the desired land. Acting under a vote of the aldermen and common council, passed March 9, 1896, viz: "That the Board of Water Commissioners of the City of Newburyport be and are hereby authorized to purchase for and in behalf of the City of Newburyport, such lands, water and water rights, as the said Board shall from time to time deem necessary, for the extension, protection and improvement of the

water supply of said city," negotiations were opened with the Jackman heirs, and a purchase made of some six or more acres of land at the river end of the Jackman ravine. This was an important beginning as it secured to the city all the water to be derived from this basin. Believing that the water in the pond was being contaminated from the buildings on the Moulton farm, that lot of fourteen acres was next purchased, all the buildings removed, grounds cleaned up, and the field sown down to grass. This purchase was soon followed by another, of ten acres on Spring lane, covering the north side of the Jackman ravine and running to High street. Later, in May, 1896, came the purchase of twenty-three acres, of W. B. Hopkinson, which purchase conveyed to the city the famous Bartlett boiling spring.

As soon as the condition of our treasury justified, a movement was made toward the permanent improvement of the pond. The services of Engineer Percy M. Blake were procured to furnish plans for the inspection of the commissioners. These plans as finally decided on, included the enlargement of the pond, excavating it to a uniform depth of ten feet, paving the slopes with square pavers, the construction of a settling basin for the Moulton brook, an intercepting canal from the Bartlett Springs, with a collecting well for the same, the laying of some

1600 feet of six and eight inch collecting pipes, with distributing valves, a gate house with its valves, screens, etc., the raising of the roadway some four feet, and the general grading of the entire area about the basin. Believing in the justice of distributing the intended outlay in our own city, all the work, as far as possible, was given to Newburyport citizens. A contract was made with Cornelius H. Kelleher for the main part of the work, a wharf was built and all stone, etc., landed direct from the vessels. As a result of the work some 15,000 cubic yards of material were excavated from the pond. 563 tons of granite were used in the settling basin, 150 tons of split granite and 100 barrels of Portland cement in the construction of the gate house, and 3,920 square yards of block stone paving, equal to about 80,000 pavers in number, on the slopes of the main basin. The gate house is constructed with copper wire screens in the well, so arranged as to be removable for cleaning. All the water from the new pond must first pass through these screens before reaching the pumps. The new basin has a storage capacity of some over four and a half million gallons. In addition to the above all of the old eight inch suction pipes between the pumps and the wells have been removed and replaced with twelve inch pipes and gates, so that any or all of the wells and the new ba-

sin can be severally pumped from as necessity may require, which could not be done before on account of the small size of the old pipes. This part of the work was of more than ordinary difficulty, as the old pipes had to be removed and the new ones put in place without stopping the pumps. These changes required several tons of special castings, gates, and pipes, and being necessarily of great importance called for work of the most thorough and exact character. It was successfully accomplished by our own men under the direction of Engineer Blake.

The commissioners would here emphasize the fact that while they have brought the quality of the water up to the highest standard in every respect, and have largely increased the storage capacity so that they can now save all the water flowing from the springs and also retain more of the rainfall than formerly, they have not as yet added so materially to the sources of supply as to afford a surplus of water at the works that will allow any waste of the same.

The acquisition of the Bartlett and Moulton springs have given them control of all the water in that area, yet they have thought it of the greatest importance to obtain full control of the Jackman ravine as an auxiliary supply for the near future, and all work has been carried on in line with an extension in that direction. While the new basin was in process of

construction a temporary dam was built at the lower end of the Jackman ravine, impounding a large amount of water for use in case any emergency should arise, which fortunately did not occur. This supply was in addition to the water pumped daily from the Jackman Springs. Before long it will be necessary to improve this ravine in a way similar to the old pond, by building a permanent dam near the river, using the entire ravine as an impounding basin, connecting the same with the new basin by a ten inch pipe line around the river point, taking the water around by gravity. This work can be done at comparatively small expense, the dam and pipe line being the main features. No paving or rock work will be needed, the nature of the soil being such as not to require it.

All of the work so far completed is of the most permanent and lasting character,—nothing but the best material being allowed to enter into these improvements, while at the same time great care has been exercised in the expenditure of every dollar. The entire cost of the improvements will be about \$23,000, while some \$15,000 additional has been expended in the purchase of real estate.

The report of the superintendent, which is transmitted herewith, will give you much information as to what has been accomplished in the streets of our

city in connection with mains, hydrants, stand pipes, meters, etc. The reports of the treasurer, auditor, also of engineer Percy M. Blake, which accompany this report, will supply fuller details of the various matters to which the commissioners have given their attention. It should be noted from the report of the treasurer that while the city has paid to date for the water furnished the public buildings, and also for fire service for the six months due July 1, 1895, no payment for fire service has been made by the city since that date, although bills for the same have been duly forwarded to the city treasurer at the expiration of each of the three six months' terms which have passed by since the date of the payment above named.

The policy of the commissioners being to bring the plant to a high state of perfection as rapidly as sound business management will allow, it is evident that a new standpipe should be among the first matters to receive attention. Probably a new pipe of smaller diameter and some thirty feet higher would increase the pressure and make hydrant streams quite effective. A new pumping main, direct from the station down Merrimac street, is called for as soon as practicable, which should be a twelve-inch pipe to replace the present eight-inch cement pipe,—this twelve-inch pipe to extend to Market square. The

smaller size pipes which were laid in many of the cross streets should also be replaced by pipes of larger capacity. The pumps will need considerable attention the coming summer, and with the opening of spring a large amount of grading must be done around the basin, which was prevented by cold weather last November.

In regard to the question of water rates, the commissioners would say that the manner of administering a water plant has exercised the minds of those furnishing the water, for a long time. Many expedients have been tried, such as charging according to number of fixtures, according to number in the family, according to frontage of land, etc. It is evident that none of these plans will work equitably. The justice and consistency of selling all water by meter measurement is now generally acknowledged. Many cities have adopted this manner and many others are gradually adopting the same system. Our experience has constrained us to believe in this system, and we trust the time will come when Newburyport will furnish water in no other way. At present the water rates remain the same as were charged by the Newburyport Water Company before the transfer to the city. It must be plain to all that there can be no revision of these rates by the commissioners until it is determined what sum the city is to pay for the

water plant, as not until that time can it be estimated what yearly net income will be required to pay the interest on the "Water Loan," then to be created, and also the amount to be set apart annually for the credit of the "Sinking Fund" which is to provide for the payment of said loan at maturity.

In conclusion, the commissioners deem it but just to themselves to allude to the expenditure of thought, time and labor required of them in caring for this department of the interests of the city, with which they have been entrusted. They have held and attended sixty-four meetings of record (twenty-three in 1895 and forty-one in 1896) during the time covered by this report, while frequent visits to the works, numberless consultations with each other, and necessary interviews with parties carrying on or connected with the improvements, have required their daily attention and oversight. They trust these efforts, and the results arising therefrom, will meet with your approval and be favorably considered by all our citizens.

A. B. ADAMS, Auditor.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Water Commissioners,

GENTLEMEN: Agreeably to the annual custom of superintendents, I hereby submit to you a report of the Newburyport Water Works for the years 1895 and 1896.

PUMPING STATION.

During 1895 very little was done at the pumping station in the way of repairs, but considerable work was done to assist Mr. Blake and other engineers in behalf of the city for the water hearing case.

PUMPING ENGINES.

Since the works were turned over to the city nothing has been done to either set of pumps but what was absolutely necessary to keep them running although in a very bad condition. The cylinders are leaking badly and should be renewed or re-bored without delay.

The large set of pumps are very weak, and it would cost nearly as much to put them in good order as it would cost for a new set with all the latest improvements. It is only by great care on the part of our engineer that they can be made to do service.

NEW PUMP FOR CONDENSER.

A new Barr duplex steam pump was purchased to supply the condenser with river water (about 45,000 gallons per day) which had formerly been wasted to the river. The condenser has recently been cleaned and repaired.

BOILERS.

The boilers have been regularly inspected by the Hartford Steam Boiler Inspection and Insurance Co., who report the care and condition of them good. In 1895 two tubes in No. 2 had to be plugged on account of leaks by corrosion.

NEW SUCTION PIPES.

The new suction pipes leading from the receiving basin and wells to the pumps are giving good satisfaction. It is now possible to draw the wells down to the foot valves, which was an impossibility with the old suction pipes.

NEW RECEIVING BASINS.

The Moulton and main receiving basins which were finished last year have given the city something that is well worth the money expended. We can now supply the city with good wholesome water.

A pipe line should be laid from the Jackman springs dam to the receiving basin by way of the river bank and save cost of pumping the same water twice.

RELIEF VALVE.

April, 1895, a five-inch relief valve was placed in the pumping station, and connected to the force main, and with a waste pipe leading to the basin. This valve is used when the stand pipe is out of commission, and can be used if an accident should occur to the tank; the city would then be supplied by direct pumping.

THE STANDPIPE.

The standpipe was drawn down in May, 1895, for the purpose of inspection and cleaning. A new gate was placed in the twelve inch pipe which leads to and from the force main and standpipe, which was closed and the city supplied by direct pumping for four days. The direct pumping was found to work very well.

Engineer Blake, Mr. C. H. Sargent, and the superintendent, examined the standpipe and found the shell internally to be badly corroded to a depth of nearly one-eighth of an inch, and otherwise in a very weak condition.

DESTRUCTION OF MAINS AND SERVICE PIPES BY
ELECTROLYSIS.

A leak was discovered in 1895 on the six inch iron main on Merrimac street near the Coffin Hat factory, caused by electrolysis, which had eaten a

hole through the pipe about three-fourths of an inch in diameter. The main upon further examination was found to be badly eaten away for a distance of 100 feet and its effects could be traced for a distance over 350 feet.

Two service pipes have been renewed for the same cause in this locality.

This seems to be the location where the electrical current leaves the pipes and enters the wet soil on its return to the power station, instead of following rails as it should do. If this action should continue for any length of time it will destroy the pipes in this part of the city.

The cost of repairs caused by electrolysis to Dec. 1, was about seventy-five dollars (\$75.)

Respectfully submitted,

W. H. LAWRENCE,

Superintendent.

Newburyport, Jan. 13, 1897.

NEWBURYPORT WATER WORKS, NOVEMBER, 1896. AFTER IMPROVEMENTS.

ENGINEER BLAKE'S REPORT.

The Board of Water Commissioners, Newburyport, Mass.,

GENTLEMEN: At your request I submit the following report on the improvements designed and carried out in the vicinity of the pumping station under your direction during the year 1896.

These improvements consist of first, the cleaning out and rectifying of the pond or basin in which surface and spring waters have been stored since the construction of the water works in 1881 by the Newburyport Water Company. At the time the water works came into the possession of the city, this basin contained when full, about two and one-quarter million gallons of water. The Board recognizing the filthy condition of this basin, decided to make a radical improvement in it by removing all the mud and the remains of old tannery vats, roots, stumps and other debris which it was known to contain, forming new slopes, greatly increasing the depth of the water and the storage capacity, and otherwise modernizing the basin so as to make it a fit receptacle for storing and yielding water which would

be potable and satisfactory in appearance to the users of water. This improvement included also the excavating of the mud surrounding the outlet of the Moulton springs and the forming of a supplementary basin in which spring water could be stored and thence overflow into the main basin, or through pipes into well number four, the water in which was and had been since the construction of the well turbid and sometimes dirty.

Second, the conducting of the water from Bartlett spring through a tight pipe line into the new basin and into well number four. This project included also the draining of the swampy land which the Bartlett brook traversed, and the diversion, through a clean channel, of the natural brook water flowing from the upper part of the watershed into the main basin.

Third, the construction of a gatehouse with inlet ports and adjustable screening arrangement, through which the water in the improved basin can be drawn for use.

Fourth, the laying of new suction pipes from the pumping station to the several wells and the new basin, with proper provision for shutting off each or any of the wells, and the conducting of the overflow of the wells through tight pipes into the new gatehouse.

Fifth, the laying of a proper waste pipe, controlled by a tight gate, from the new basin to the river, with provision for automatic overflow, so arranged as to keep out river water at times of extreme high water in the river.

Plans of these several improvements were prepared under your direction and with your approval, and contracts were made for such portions of the work in each case, as could be advantageously done by such method.

The first and most important contract made was that for the main basin, and the agreement for this part of the work was signed on August 14, 1896, with Cornelius H. Kelleher, contractor, of Newburyport. Other contracts for constructing this basin were made with Pigeon Hill Granite Company of Rockport, Mass., for paving blocks for lining the interior of the basin, and for building stone for walling the smaller or Moulton basin and for the substructure of the gatehouse and for the wasteway.

Mr. Kelleher's contract called for the removal from the pond or basin of all mud, other material and old structures, necessary in forming a basin in which the uniform depth of water should be ten feet, and the removal by excavation of all mud, roots, etc., from the Moulton basin. Under this contract all of the materials removed which were suitable for

the purpose were deposited in the immediate vicinity of the work, the greater part being placed between the new basin and the river, forming thereby a level area of land above high water mark in the river.

In the construction of this basin and the Moulton basin 15,636 cubic yards of rank mud were removed; the crib work and stone filling of an ancient wharf were taken out in piecemeal, together with seven old tannery vats, some of them containing the desiccated bark and putrefactive products originally placed therein. The cleaning out of this filthy mass is alone worth, from a sanitary standpoint, all that the improvement has cost.

The new basin has a level bottom of gravel, sand and clayey soil, and its slopes are paved throughout with clean granite blocks laid by hand, on edge, on a backing of clean gravel, and rammed to a firm position. The total area of this paving is 3905 square yards, all of which was furnished by the Pigeon Hill Granite Company, and laid by Mr. Kelleher under his contract. The storage capacity of this new basin when full is 4,665,000 gallons, and of this quantity four-fifths may be regarded as potable water at all times. The high water area is 75,647 square feet, or very nearly one and three-quarters acres; the area of the bottom is 49,055 square feet or one and one-eighth acres; the depth of water when the basin is full is ten feet.

The storage capacity of the Moulton basin is 195,000 gallons; the average depth of water when full, five feet; the high-water area about one-eighth of an acre.

To improve and protect the Bartlett spring source the spring was deepened and a stone well six feet in diameter, topped with brick work, constructed. From this well a six-inch cast iron pipe was laid, on a true grade, to a similar well near the upper end of the main basin. Nearly parallel to this pipe line, a line of drain pipes with open joints was laid in a ditch excavated in the sand underlying the swamp. This drain pipe was surrounded with screened gravel, and collects and conveys ground water and filtered water coming down the brook beyond the Bartlett spring, to the well into which the pipe from Bartlett spring discharges. An iron pipe line is extended from this lower well through to well number four, and is provided near the latter well, with three outlets, one discharging into well number four, one into Moulton basin, and the other into the main basin, with an arrangement of valves which permits of turning the spring water into either of these receptacles. This piping is also so arranged that well number four can be replenished from the main basin, when the water in the latter is high enough, or from the

Moulton basin. A low level pipe is laid at this point from the bottom of the Moulton basin into the main basin, so that an alternating flow can be had, or the Moulton basin drained of its contents.

The two small wells in the vicinity of Bartlett spring are protected with substantial plank covers, and the whole arrangement thoroughly protects the spring water from pollution, and preserves its low temperature.

The gatehouse is ten feet by seven feet six inches inside, in its sub-story, which consists of block granite laid in cement mortar, lined with twelve-inch brick work laid in Portland cement. The gatehouse rests upon a foundation of spruce, consisting of eight by eight bearers covered with two thicknesses of two-inch spruce plank laid crosswise. The interior of this sub-story is divided into two parts, with an opening in the division wall for two sets of copper sash screens.

The superstructure consists of twelve-inch brick walls laid in cement mortar, with hipped roof covered with black Monson slate. It is lighted by three triple-light windows and has one door on the pumping station side. Its floor consists of two-inch spruce plank with a border of brick laid on edge in Portland cement. The building is dressed with granite underpinning, threshold and window sills; the

window openings have flat arches turned in brick.

Water from the basin is admitted into this gatehouse through two fourteen-inch heavy cast iron pipes, each having on the inner end a fourteen-inch single gate valve, operated by extension rod with standard and hand wheel, the standard being provided with an indicator showing the amount of water admitted at different positions of the valve. The lower of these inlet pipes is located one foot above the bottom of the basin, the upper one four feet below high water mark

The water is withdrawn from this gatehouse through one cast iron fourteen-inch suction pipe, first passing through the fine copper screens before entering this pipe.

The overflow of water from wells one, two and three is conducted to this gatehouse and enters the screen well through a ten-inch cast iron pipe. Provision is made just outside the gatehouse in this ten-inch pipe for receiving the water from the Jackman springs, by gravity, through a pipe line to be laid from the Jackman brook along the bank of the river and in front of the pumping station to the gatehouse. Water will flow, by gravity, from the springs to this point if such pipe line is properly located and graded.

New suction pipes have been laid to the gatehouse and to each well or to a point as near each well, as it

was practicable to go without making it necessary to disturb the pipes passing through the sides of the wells. This part of the work was a most troublesome and difficult one, it being necessary to do the work in short sections without disturbing the old pipes and without interrupting the pumping service upon which the city depended for its hourly supply of water; also in laying these new pipes up to each well and there connecting with the well itself, care had to be taken that there were no unnecessary delays in making the final connection, as the rise of water in the ground surrounding the well would interfere with making the joints. For these reasons these new pipe connections were proportionately the most expensive part of the new work. It is impossible to conceive of a more slipshod and inefficient arrangement than that which was found to exist in the old piping.

The new connections are as follows: First, a fourteen-inch pipe now extends from a point about ten feet outside the pumping station to the new gate-house, and this fourteen-inch pipe is provided with two twelve-inch branches, the nearer one pointing away from the pumping station, and the farther pointing back toward the pumping station. From the latter a twelve-inch pipe extends toward the pumping station and contains a twelve-inch branch

pointing back toward the basin. From this latter branch a twelve-inch pipe is laid in the direction of the wells, and a short distance from the pumping station contains a twelve-inch branch, looking back toward the fourteen-inch pipe first described with which it is connected by a twelve-inch section entering the twelve-inch branch of the fourteen-inch pipe described above as looking away from the pumping station. The fourteen-inch pipe going toward the pumping station is reduced to twelve inches, and connected with the suction pipe of the larger pumping engine. The twelve-inch pipe leading toward the pumping station is reduced to eight inches as it enters the station, and is connected with the suction pipe of the smaller pumping engine. The two twelve-inch lines leading from the two suction pipes are merged in one twelve-inch line and extend toward the wells. An eight-inch branch runs from this twelve-inch line to wells one and two, and near well three the twelve-inch line is reduced to eight inches and connected with well three. Back of this connection with well three, a ten-inch branch is inserted in the twelve-inch line, and a ten-inch pipe extended to and connected with well four.

In these new connections there are set standard Ludlow valves of the double disc pattern at such points as to make possible the drawing of water by

either pumping engine singly or in combination, from the wells or gatehouse, either singly, or together. Each well can be shut off from the combination without interfering with the pumping of water from the other three, and wells one and two together and wells three and four together can be shut off from the system of piping, in each case, by the closing of one valve.

The use of these new connections for two months has shown that they were successfully laid, and the superintendent reports that they are giving entire satisfaction and that the pumping engines are now enabled to lower the water in the wells to a point much below that possible when the old suction pipes were in use. While this improvement probably will not much, if any, increase the annual yield of the wells, it will undoubtedly enable more water to be drawn from them for a short length of time than was possible with the old pipes.

The effect of this more rapid drawing from the wells will very likely be seen in the increased turbidity of the water drawn from wells three and four, but this may be in part overcome in the case of well number four by the admission of water from the Moulton basin and the Bartlett spring. These two wells should be reconstructed by lining them with brick work laid in Portland cement mortar, such

brick work to rest upon an annular plank platform placed on the floor of the well. After such brick lining is constructed, the bottom of the well should be ballasted with twelve inches of fine broken stone or fine screened gravel and Plum Island sand, through which the water would be filtered in its upward passage. The brick lining would prevent the inflow into the well, of any water above the level of the bottom of the well. Wells of this kind are usually and successfully constructed in this manner. The present plank linings of wells three and four are not stable, and in the case of well four it is not improbable that a collapse may occur at any time.

The new suction pipes where they are reduced in front of the pumping station to make connections with the present pumping engines, are so designed that when a new pumping plant is installed they can be extended, one at a time, to connect with the new pumping engines, at slight expense, and the present pumping plant should be replaced before many years by modern and economical machinery. A properly designed plant can be operated by the consumption of but little more than half the fuel now being consumed by the crude machinery in use. The annual saving in fuel by substituting economical engines would more than equal the interest and a sinking fund instalment on a new pumping plant.

Another important improvement, which is provided for in the gatehouse connections, is the bringing of the Jackman brook water by gravity to the new basin. The construction of a comparatively inexpensive dam and basin in the valley below the Jackman springs, and the laying of a properly graded pipe line from such dam around to the new gatehouse would save the cost of pumping the Jackman water over the divide, as is now done, and this annual saving would meet the interest on the cost of this improvement. All of the Jackman brook water would then be available at the pumping station.

It is believed that all of the work done under your direction during the past year in the vicinity of the pumping station, has been thoroughly done, and the contractors who have contributed to this end deserve commendation for the faithfulness with which they have carried out their contracts. Undoubtedly some further grading and draining of the graded surfaces will have to be done in the spring, but this can well be done by the superintendent, whose fidelity and interest in the work of improvement has been noticeable.

No statement of the cost of the work is submitted herewith as the bills paid are filed with your treasurer. Some of the work done was not easily estimated in advance, and much of the more com-

plicated work was done by day labor, it being impossible to prepare specifications which would anticipate and cover the contingencies to be met and overcome. From a long experience in work of this character I believe that the city has received full value in every instance for moneys paid out on account of these improvements.

Yours respectfully,

PERCY M. BLAKE,

Engineer.

SCHOOL DIRECTORY AND CALENDAR

SCHOOL COMMITTEE ROOM—City Hall.

OFFICE OF SUPERINTENDENT—City Hall.

REGULAR MEETING OF THE BOARD—Last Monday evening of each month except July and August.

SUPERINTENDENT'S OFFICE HOURS—Wednesdays and Saturdays, 9 to 10 a. m. ; other days, 4 to 5 p. m.

SCHOOL YEAR—Begins tenth Tuesday after the Saturday preceding the Fourth of July.

VACATIONS AND HOLIDAYS—Wednesday and Saturday afternoons, Thanksgiving day and two succeeding days, Washington's birthday, Memorial day, Patriot day, Labor day; from Christmas to New Year inclusive; one week commencing the first Monday in April; also, nine weeks from the Saturday preceding the Fourth of July.

PAY DAY—Wednesday after the first Monday of each month except August and September.

SCHOOL SIGNALS

8.15 a. m.—Two strokes of fire alarm, no forenoon session of primary and grammar schools.

1.15 p. m.—Two strokes of fire alarm, no afternoon session of primary and grammar schools.

GENTLEMEN OF THE SCHOOL COMMITTEE:—

In obedience to the instructions of the board, I herewith submit the following report of the school department for the year 1896.

Respectfully.

WILLIAM P. LUNT,

Superintendent of Schools.

IN SCHOOL COMMITTEE, }
December 28, 1896. }

Voted, to accept and adopt the annual report of the superintendent of schools as the report of the school committee.

WILLIAM P. LUNT,

Secretary.

THE HIGH AND PUTNAM SCHOOLS

HIGH SCHOOL—E. C. Adams, A. M., principal; Arthur H. Berry, Sara A. Leonard, Mary T. Spalding, Ida M. Wallace, Sarah Deane, Beatrice J. Barker, assistants.

PUTNAM SCHOOL—Mary R. Bond, Harriet Piper, assistants.

The exhibition of the combined High and Putnam schools, last June, closed a year of successful work on the part of Mr. E. C. Adams and the other teachers in these schools.

That this institution is maintaining its former high rank, is evident from the facility with which its graduates pass the examinations for admission to the colleges and scientific schools, as well as by the increased number of those who wish to enter the school itself.

At the beginning of the year, in September, 1895, Mr. A. H. Berry was appointed teacher of natural science, in place of Mr. H. F. Stone, and Miss Sarah M. Deane in place of Miss Bertha J. Atwater.

As the work of the school made necessary the services of an additional teacher, Miss Beatrice J. Barker was appointed, who at the end of the year resigned and was succeeded by Miss Inez Cohen.

The Toppan prize, given to the student passing the best examination on the study of civil government, was awarded to Miss Mabelle Wadleigh, and honorable mention was made of Arthur W. Constantine.

It must be admitted that these schools are doing excellent work, and that the teachers are faithful, hard working and devoted to the interest of those for whom they labor.

The course of study is essentially the same as that in high schools of the first class, and the methods of instruction are made to meet modern requirements.

The teaching force consists of nine persons besides the teacher of drawing, and the number of pupils now belonging to the institution, is 191 in the High and 92 in the Putnam school.

It is a matter of surprise to some citizens, that with a larger number of teachers in the school now than were there ten years ago, some studies that were formerly taught are now omitted.

A much smaller proportion of the time of the teachers is now spent upon Latin, Greek and mathematics than was devoted to those studies ten years ago, although the school is much larger and more, as well as better work is done in the classics, but a great deal more time is now given to natural science and the English language.

Ten years ago, the teacher of natural science taught not only physics and chemistry, but also Latin, Greek and various other subjects, while, at present, he devotes all his time to that important branch of study.

Ten years ago the time given to the study of "English" was limited, except in the senior class, to a short exercise once a week, when a part of each class read compositions, every student being expected to write an original essay once a month; now frequent practice in writing is required, and the study of the best authors is made a part of the daily work of pupils in all the classes.

At least three or four times as many recitation periods are devoted to this important study now as ten years ago, and no efforts are spared by the teachers to bring this department to a place where our school, in common with other High schools, shall be free from the unfavorable criticisms made, justly or unjustly, by college examiners upon the teaching of English.

During the past year a change was made in the course of study, so that pupils begin physics the first year and finish chemistry the third year, thus giving opportunity for another study in the senior year; possibly more changes can be made in the course, so that several branches once taught in the school but

now omitted can be pursued as optional studies in the senior class.

Here it may be said that the scientific department in a modern high school can be maintained only with the expenditure of a considerable sum of money, as physical and chemical laboratories require a great deal of costly apparatus, which being used by inexperienced pupils, must occasionally be replaced.

A thousand dollars could well be spent upon physical apparatus alone, especially as the last large appropriation for this purpose was made in 1856 and was then only \$600, while the full time of two instructors and several hundred dollars a year for apparatus, could well be used by the department of natural science.

Could the trustees of the Wheelwright fund, who have given our boys such generous aid at the Institute of Technology, be induced to establish in our school a department of natural science, its good effect would appear in the better training of pupils for the higher institutions.

At the close of the school year the institution was obliged to part with its principal, who for eleven years had been the wise, careful and energetic director of its work. Another field of labor invited him, and although the committee held out to him all the inducements in their power, they could not persuade him to remain. The task imposed upon the sub-committee of filling Mr. Adams' place was not an easy one.

Realizing their responsibility they spent much time in examining credentials, talking with candidates and using all means in their power to form a correct judgment and to decide which one of more than fifty candidates was in all respects best fitted for the place. After much deliberation, the man who seemed to the sub-committee to be the most promising candidate in ability, scholarship, experience and in general knowledge of men and things, was Mr. George A. Dickey, and he was unanimously elected.

Mr. Dickey's term of service has not been long enough for us to be able to say much about his work, except that he seems to be gaining the respect and esteem of the pupils. We can see

nothing to prevent the school, under Mr. Dickey's care, from maintaining, in the future, the reputation that it has enjoyed in the past.

The period of eleven years, covered by Mr. Adams' principalship, and ending in 1896, was an era in the history of the school that ought not to pass unnoticed.

In 1868 the Brown High, Female High and Putnam Free schools, which up to that date had been entirely separate, each in its own schoolhouse, were united and placed in the building now occupied by the consolidated High and Putnam schools.

This union took place in the face of strong opposition from many citizens, who believed that consolidation would be bad for the schools, as well as an unwise business arrangement for the city. This gave rise to a feeling of dissatisfaction in the community and acted unfavorably upon the reputation of the schools, so that the results were less satisfactory than they otherwise might have been.

In 1885, however, an agreement was made between the trustees of the Putnam Free school and the city authorities as to financial matters and the management of the schools, of such manifest advantage to the city that the most captious citizen had no reason to complain. This action brought an end to the uncertainty that had existed as to the permanent union of the schools, and gave rise to a feeling of harmony that was very favorable to the work of a new principal. At this time Mr. Adams came into the school as principal, and soon won for himself the confidence of trustees, school committee and parents by his wise and careful management of affairs.

During his principalship and under his direction such changes were made in the course of study and in the methods of teaching as were needed to place the institution in line with high schools of the first grade.

The manner of teaching natural science was entirely changed; a laboratory was put in so that students could practice by themselves instead of merely watching the teacher perform an experiment; English was taught in a very different way, as has already been stated; the musical talent of the pupils was devel-

oped, not only directly by training the voice, but indirectly by giving encouragement to them to practice upon various musical instruments; a fine piano was purchased—partly, however, with money raised before Mr. Adams came—and a valuable working library of standard books was collected.

During this time also great improvements were made upon and around the school building; new floors were put in; modern seats replaced those of a former age; desks convenient for writing took the place of settees in the recitation rooms; a new porch was built on the front of the school house; the unsightly fences gave place to a neat iron fence that protects without concealing the well kept grounds; the brick buildings in the rear of the yard were removed and neat sanitary conveniences provided in the basement of the school building; gas and city water were introduced and no efforts were spared to make the school premises useful, pleasant and attractive.

Such having been the condition of things during the last decade, the school authorities hope, and the people naturally expect, that the past high character of the institution will be maintained, and that the earnest efforts of teachers and pupils will result in keeping the High and Putnam schools up to the standard of the best institutions of the kind.

On accepting Mr. Adams' resignation the following resolutions were unanimously adopted by the Board of School Committee:

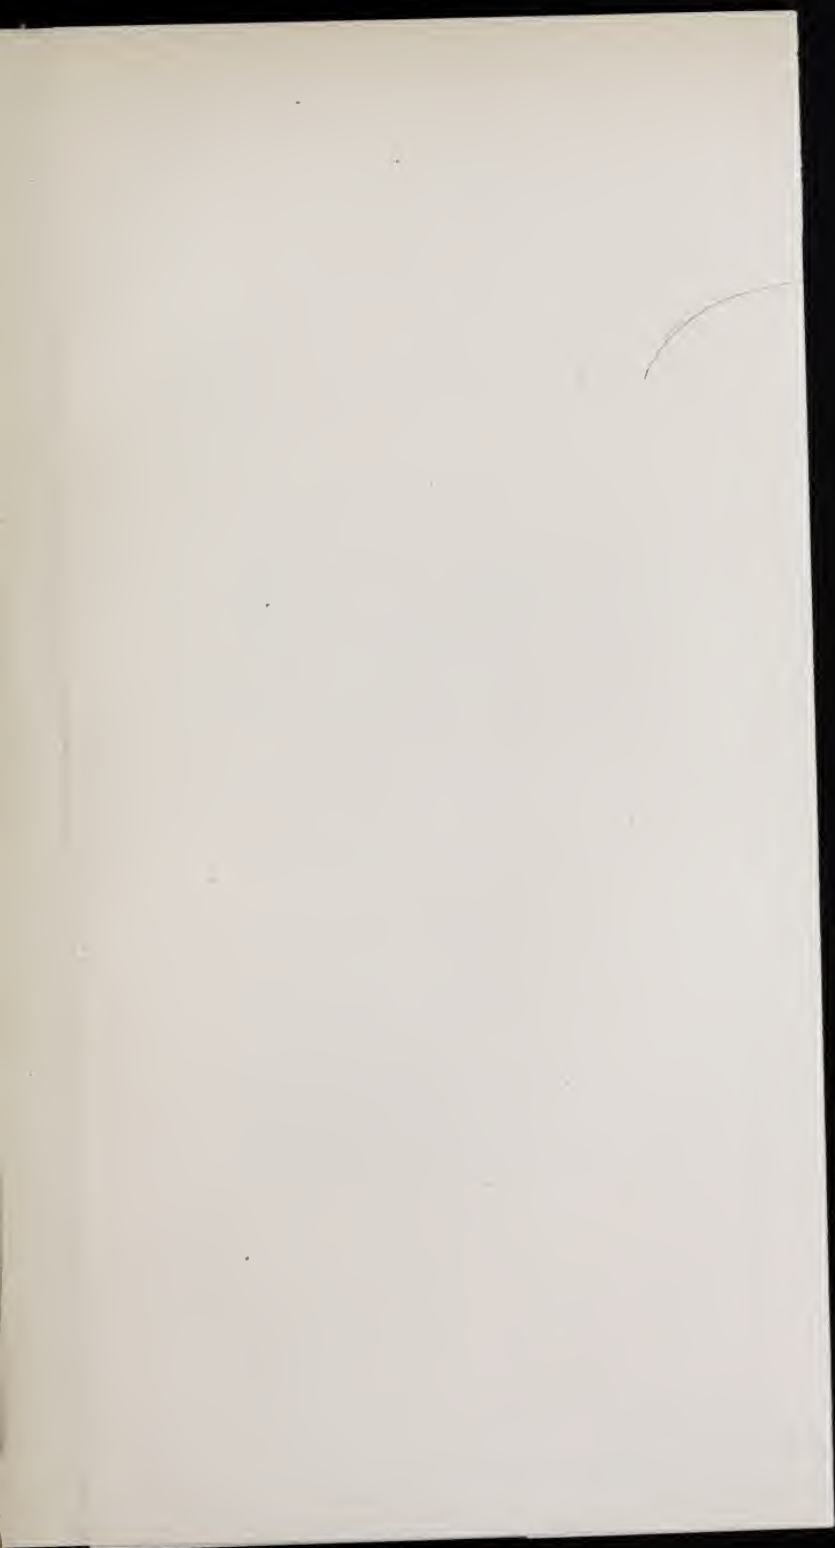

"The school committee of the city of Newburyport accept with deep regret the resignation of Mr. E. C. Adams, principal of the High and Putnam schools.

"They feel that by his departure, the schools lose an efficient, able and energetic manager, and the young people of this community, a conscientious adviser and friend.

"They realize that the high standing of these schools, at home, as well as at the colleges and scientific institutions, is due in a marked degree to his wise and careful management.

"They cordially recommend him to the people of his new field of labor, as an honorable and upright man, as well a highly respected citizen of Newburyport.

"They congratulate the school of which he is to take charge upon its good fortune in securing the services of a principal of such excellent executive ability, sound scholarship, and success in teaching."

SINGING—Class Ode(Tune, *Lux Benigna*)

Words by Carrie A. Ross.

From memory's harp, the faint sweet echoes flow
Of pleasures past.

From by gone days, the strains steal soft and low,
Sinking at last.

Soon we must part, as classmates meet no more;
Sad are our hearts, ere parting griefs are o'er.

The past is gone, the future still draws near,
With joys and pains.

We have a work in each succeeding year,
A goal to gain.

True to ourselves then let us always be,
True to our God that we His home may see.

GRAMMAR SCHOOLS

The grammar schools have pursued the even tenor of their way, with but little change in their methods or in the results of their yearly work. Such changes as have taken place consisted more in efforts to improve upon methods already in use, than in the substitution of new ones.

In the fall of 1895, Walsh's Course in Mathematics was substituted for the Greenleaf's arithmetics, which had been in our schools for a long period of years. The change was desired by nearly all our grammar school teachers, and was recommended after careful consideration by the committee on text books. Up to the present time no reason has been seen to regret this change. Our schools have always stood well in this branch of study, and it is expected that they will maintain their rank in the future.

Much improvement in penmanship was noticed during the year in nearly all grades, as shown by the written exercises at the monthly examinations, rather than by specimens designed as tests only of writing. This was particularly the case in the work of the principals' rooms. At the close of the school year, which ends in June, the school board voted to introduce vertical penmanship in all grades of primary and grammar schools. It is too early at the present writing to form a decided opinion as to the results of this system of penmanship in our schools, but in other places where a more extended trial has been made, the results have been exceedingly gratifying.

The study of history has been pursued with increased success. At no time before has this subject been taught so well as at present. The pupils seem to have an intelligent understand-

ing of the great questions which have arisen from time to time, of the way those questions have been decided, and of the important events which have occurred in the past, and of the influence they have had upon the history of this country. But little attention has been given to memorizing unimportant details, such as the killed or wounded in battle, but the story of our nation in its birth, its development, its trials and its progress, has been well studied and understood.

In language and grammar the course of study pursued for several years has been continued. While a limited amount of technical grammar has been taught, special attention has been given to practical language. Some effort has been made in this branch to correlate with other studies, such as history and geography. Some very excellent work has also been done in connection with the current topics of the day.

Few changes occurred during the year in the corps of grammar school teachers; none among the principals, although owing to the ill-health of the principal of the Jackman school, it was necessary to supply a substitute for about half the year. Mr. H. W. French, of Quincy, took charge of the school during Mr. Brown's absence. Miss Hulbert, the assistant in the Forrester street boys' school, resigned to take a more advantageous situation in the western part of the state. Miss Alice A. Bartlett, the third assistant in the Bromfield street school, was transferred to fill the vacancy.

Miss Ireland, who had been granted leave of absence during the fall term, resigned her position in the Kelley school in December, and Miss Alice W. Hopkinson, who had acceptably taught the room during her absence, was appointed her successor.

While most of our grammar schools are doing excellent work, better results still might be obtained by the cordial co-operation of all the parents. In some schools this is shown in various ways, and is of the greatest help to the teacher and the child. There is better attendance, there are fewer dismissions, while the moral support which the parent gives at home makes the pupil more respectful, obedient and industrious at school. Whatever the short-comings of the teacher may be, the parent who has any

regard for the good conduct and progress of his child, will never uphold him in neglecting his duties at school, or in showing a want of obedience and respect to his teacher. Much of the success of our best teachers is due to the confidence and support they have obtained from the parents of their pupils, and to the prestige of a long and successful experience in the schools.

With the new teacher this prestige is wanting, and the road she must pursue is beset with many difficulties. Every act or word is more carefully examined and criticised.

This subject is particularly applicable now, for we are liable at any time to lose those teachers who have so long and so successfully taught in our grammar schools, and it is difficult to fill their places.

PRIMARY SCHOOLS

But few changes occurred among the teachers of these schools during the school year. Miss Susan I. Adams, teacher in the Temple street school, resigned her position, and Miss Lillian Goodwin, who had successfully substituted for her, was appointed to the vacant position. Miss Adams had proved an excellent teacher and had brought her school to a high standard of excellence.

Miss Alice A. Bartlett, third assistant in the Bromfield street school, was transferred to the first assistant's position in the Forrester street boys' school. Miss Mary T. Colby was appointed to fill the vacancy.

At the close of the school year Miss Elizabeth Hoxie resigned her position as second assistant in the Bromfield street school, and Miss Lillian Greenleaf was appointed in her place.

At no time have the primary schools been, as a whole, in better condition than at present. Here, as elsewhere, improved methods of instruction have obtained more general adoption than in schools of other grades, and have produced better results, than were ever secured under the conditions which once prevailed. Of eighteen teachers now in primary grades, thirteen have had the benefit of instruction at the training school, while nearly all the others are familiar with the improvements that have taken place in methods of teaching.

Particular attention is now being given to the language of the pupils, not only in trying to secure correct written and oral work, in the school, but also in correcting the common errors of speech, which the child sometimes acquires in his associations out-

side of school. Teachers have been requested to write down some of the more common errors of language and send them to the superintendent, also to drill their classes in the proper form of speech to use in correcting such errors.

At the opening of the schools in September, it became necessary to find temporary accommodation for the Ashland street school, until the enlargement of the schoolhouse should be completed. It was very difficult to secure suitable rooms, but after many places had been inspected it was decided to place one of the schools, that presided over by Miss Badger, in the room used as a mission and lecture room by the Rev. Mr. Pope. The other school, the principal's, under Miss Pettigrew, was removed to the vacant building at the foot of Woodland street. Considering the inconveniences to which these schools have been subjected, the teachers and pupils have done remarkably well in carrying on their work with so little loss in either their studies or in discipline.

It is probable that they will be able to occupy the improved and enlarged school on Ashland street early in the new year. They will have then the best building for school purposes in the city, with improved heating and ventilating arrangements. If this building should be as excellent in these and some other particulars as it promises to be, it will not only provide suitable accommodation for the children attending, but will be an object lesson for our consideration when efforts are made to secure better accommodations and conveniences for other schools.

TRAINING SCHOOL

Our city training school, which has been for five years in charge of the present principal, Miss Frances W. Richards, began as an experiment and is now a well established fact. It starts on its eighth year in a prosperous condition, having graduated thirty-seven pupil teachers.

No one thing benefits a school more than cordial sympathetic relations between the parents and the school; in some cities societies for the strengthening of this tie have been formed. The training school is most fortunate in this respect, parents co-operating heartily with the school in every detail.

The aims and methods used this year are very similar to those of previous years. The subject of fractions introduced in the lowest grades last year has been faithfully carried on and with astonishing results. The system of vertical writing introduced this year is very successful so far and seems to be the natural method for little people.

A class of three, Ella Richardson, Bessie Pike and Charlotte Holmes, was graduated in February, 1896. The exercises were held in one of the rooms of the Kelley building and were conducted by the superintendent of schools, who presented the diplomas. An address to the students and their friends was given by Mr. Henry T. Bailey, state supervisor of drawing. It would be of great benefit to the school if the course could be supplemented and enriched by occasional lectures from some of the leading educators of our land. This would broaden the pupils' ideas as to what a teacher's work consists.

In June a class of four more young ladies left the school as graduates to find positions in other schools. The class consisted

of Jennie Adams, Grace Morse, Alice Stevens and Maud Huntington. All the year's graduates are successfully teaching: three in Amesbury and four in cities near Boston.

Although the school trains its pupils in only primary work, still several of the graduates are teaching in grammar grades and doing the work with quite a little satisfaction to those having the schools in charge. Nearly all the substitutes needed in the city have been furnished from the school. During the spring term a pupil teacher was sent to assist in the Temple street school and for a short time one was sent to the Purchase street school for the same purpose.

EVENING SCHOOLS

The evening schools were held, as usual, in the Temple street schoolhouse. Mr. Irving H. Johnson was principal of the boys' school. He was assisted by Miss Elizabeth Dodge, Miss Helen S. Merrill and Miss Harriot Colman.

Miss Lizzie C. Ireland took charge of the school for girls. Her assistants were Miss Margaret Sargent and Mrs. Amos Geary.

The sessions continued till late in March, giving each school about thirty evenings.

The dulness of business and consequent removal of many families lessened, to some extent, the number of pupils. Otherwise the schools were quite successful.

DRAWING

Just a year has elapsed since Miss Sadie Morse was employed as supervisor of drawing in the public schools.

For only one year's work the result from the schools is very good. Improvement is seen, first in the way in which the pupils start in on a lesson, and second, as a consequence of the first, in the result obtained. It is necessary at first to explain a great deal, and show many sketches on the blackboard. Now less of both is required, as the pupils can do more for themselves.

Some pupils find freehand drawing easier; that is drawing from flowers, sprays, vegetables and other objects; while others do better in mechanical work, drawing by means of instruments.

This is one reason why both freehand and mechanical drawing are in the course. This year they will also have some work in design. There is no one who cannot do something. Of course all cannot do equally good work. Can one imagine a person so situated that he will never need to use drawing in any one of its various phases? Here we find a second reason why drawing should be taught in all its many divisions.

There is no broader subject in the schools than drawing. It is capable of correlation with every other study, hence it is suggested that the pupils should be asked to illustrate their regular work. Drawing is a language and pupils should use it to help express their thought. It is not merely an independent subject.

The primary and grammar grades are doing their own work, as far as is possible, with two or three grades in one room.

The supply of geometric solids in the grammar rooms has been increased. The pupils draw first from a certain geometric

solid, as a cylinder, to learn the principle, and then apply it to some common object based upon that solid, as a tumbler, a bottle, a cuff.

It has been difficult to obtain a sufficient number of objects that are similar for a whole room. It would save much time and trouble as well as insure better results if each school owned the necessary number of objects just alike.

In the High school there has been marked improvement. Last year the supervisor of drawing met three classes, each one period per week. Those of the seniors and juniors who wished to take drawing made one class of thirty; all of the third class, numbering seventy-two, made a second division; and all of the fourth class numbering eighty-five made a third. There is a great deal of individual work necessary in teaching drawing, hence it is quite difficult to compress the work, with such large classes, into forty minutes. This year the supervisor gives one whole day each week to the High school and meets six classes, none numbering more than twenty-eight and some less. With this arrangement there must be a great improvement as she can give more time to each pupil. There is more material with which to work, that is, ten casts and various dishes, etc., have been added recently. Having the proper material all we need is the time to show results. It will take two or three years, if not more, to bring the High school up to the work of its own grade, because it was necessary to begin with the grammar grade work. In nearly every schoolroom in the city the best results from the last lesson are placed on the wall, so there is a constantly changing exhibition of the pupils' work. This has proved helpful in many ways. By looking at good drawings, especially if done by one of their own class, the children can understand how to continue and improve their own work much better than they could from any explanation. There has been some good work done, and by the end of the school year there will be quite a good deal which the parents and the general public will be interested to see, especially as drawing is a new subject and so few know what we are doing in the public schools.

For this purpose it is recommended that toward the last of

May a suitable place be provided where work from every school in the city may be placed on exhibition and that this exhibition last a week.

TEACHERS' MEETINGS

At the opening of the schools in September, 1896, a meeting of the teachers of the grammar and primary schools was held to consider the work for the new school year.

An effort was made at this meeting to take a broader view of what should be the aim of the teachers in their several schools. It was felt that the true welfare of the children and the schools demanded something more than the mere attainment of a certain amount of efficiency in the various branches of study. The teachers were asked to endeavor to so conduct their schools that there might, as far as possible, be developed and strengthened those traits of character that would make better men and women of their pupils, and to pay particular attention to the results of their efforts in securing correct habits.

It was impressed upon them that truth, industry, integrity and self-control might be attained to a certain degree, by attention to the methods of study and recitation, and by care in the details of the schoolroom and that no amount of merely intellectual acquirements would be of so much value to the pupils in their charge as to counterbalance the loss of good habits already acquired, or a failure to regard the development of character in school life. As school children are advanced from room to room, it should be the aim of the teacher to consider their previous training, and to see that while advancing in learning, there would be no falling off in whatever they had already acquired of correct habits, but that with each step forward there should be an equal advance in good conduct and in the attainment of those virtues and correct habits that were of far more importance to

their true success in life than knowledge in any or all branches of study.

At the various grade meetings, besides the consideration of methods of instruction and school management, many other topics have been considered. Among others may be mentioned the influences that might be brought to bear upon the children to induce them to aim at keeping the school premises neat and orderly, and an attempt to help the improvement societies in that way, and by care in avoiding littering the streets with paper. And again teachers were requested to do whatever could be done by them in preventing the use of vulgar language among their pupils either around the schools or about the streets. Whether these ends can be attained, or not, it is certain that in many schools, the teachers have the respect and affection of their pupils, and great influence over them, even away from the schoolroom. In such cases, if complete success is not attained by their efforts, it is certain that much good will be accomplished, especially in creating a sentiment in the school for the good and against the evil.

REPORT OF THE TRUANT OFFICER

GENTLEMEN OF THE SCHOOL COMMITTEE:

I have the honor to submit my report in tabulated form for the year ending June, 1896, with the census of school children for May, 1896.

The conditions for the year have been about the same as in previous years. In visiting the several manufactories I found a disposition to comply with the requirements of the law.

While truancy occasionally occurs, and will not be entirely eradicated till human nature changes, I have done all in my power to prevent it, and think that it has decreased since last year.

Respectfully,

ROBERT G. ALLEN,

Truant Officer.

TRUANT OFFICER'S REPORT FOR THE YEAR ENDING JUNE 27, 1896.

	No. placed on probation																									

Respectfully submitted,

ROBERT G. ALLEN, Truant Officer.

EXTRACTS FROM PUBLIC STATUTES

[CHAPTER 498]

SECTION 8. Every person having under his control a child between the ages of eight and fourteen years, and in every city and town where opportunity is furnished, in connection with the regular work of the public schools, for gratuitous instruction in the use of tools or in manual training, or for industrial education in any form, a child between the ages of eight and fifteen years, shall annually cause such child to attend some public day school in the city or town in which he resides, and such attendance shall continue for at least thirty weeks of the school year, if the schools are kept open for that length of time, with an allowance of two weeks' time for absences not excused by the superintendent of schools or the school committee. Such period of attendance shall begin within the first month of the fall term of school, and for each five days' absence of any such child thereafter, in excess of the above allowance, before the completion of the required annual attendance of thirty weeks, the person having such child under his control shall, upon the complaint of the school committee or any truant officer, forfeit to the use of the public schools of such city or town a sum not exceeding twenty dollars, but if such child has attended for a like period of time a private day school approved by the school committee of such city or town or if such child has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or has already acquired the branches of learning required by law to be taught in the public schools, or if his physical or mental condition is such as to render such attendance inexpedient or impracticable, such penalties shall not be incurred.

SECTION 3. The truant officers and the school committee of the several cities and towns shall vigilantly inquire into all cases of neglect of the duty prescribed in section one, and ascertain the reasons, if any, therefor; and such truant officers or any of them, shall, when so directed by the school committee, prosecute in the name of the city or town any person liable to the penalty, provided for in such section. Police, district and municipal courts, trial justices and judges of the probate court, shall have jurisdiction within their respective counties of the offences described in section one.

SECTION 15. Whenever a truant school has been established for any county it shall be the place of confinement, discipline and instruction for all truants within the cities or towns of said county, unless said cities or towns have made other provision therefor; and police, district or municipal courts, trial justices and probate courts, shall have jurisdiction within their respective counties of the offences described in sections nineteen and twenty-one of this act; and may commit truants to such truant school or union truant school as may be established for their respective counties under the provisions of this act.

SECTION 22. Whoever, after notice from a truant officer to refrain from so doing, offers a reward for services to any child, in consequence of which reward such child is induced unlawfully to absent himself from school, or whoever, after notice as aforesaid, in any manner entices or induces any child to truancy, or whoever knowingly employs or harbors any truant or unlawful absentee from school, shall forfeit not less than twenty nor more than fifty dollars to the use of the public schools of the city or town in which said offence occurs, to be recovered by complaint.

SECTION 23. Truant officers in cities and towns are hereby authorized, under the direction of the school committees of their respective cities and towns, to apprehend and to take to school without warrant all truants found wandering about in the streets or public places.

SECTION 13. No child under thirteen years of age shall be employed at any time in any factory, workshop or mercantile establishment. No such child shall be employed in any indoor

work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools of the city or town in which he resides are in session, or shall be employed in any manner during such hours unless during the year next preceding such employment he has attended school for at least thirty weeks as required by law.

SECTION 10. The school committees shall not allow any pupil to attend the public schools while any member of the household to which such pupil belongs is sick of small-pox, diphtheria, or scarlet fever, or during a period of two weeks after the death, recovery or removal of such sick person; and any pupil coming from such household shall be required to present, to the teacher of the school the pupil desires to attend, a certificate, from the attending physician or board of health, of the facts necessary to entitle him to admission in accordance with the above regulation.

MEETINGS.

CITY COUNCIL.

FIRST MONDAY EVENING OF EACH MONTH.

SCHOOL COMMITTEE.

LAST MONDAY EVENING OF EACH MONTH.

OVERSEERS OF THE POOR.

LAST MONDAY EVENING OF EACH MONTH.

REGULAR COMMITTEE MEETINGS.

Commencing with last Monday of each month.

Monday evening—School Committee; Lighting Streets, etc.; Bridges and Culverts; Overseers of the Poor.

Tuesday evening—Public Property.

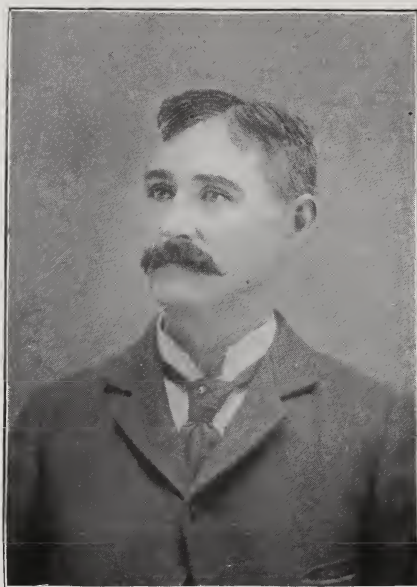

Wednesday evening—Highway; Police.

Thursday evening—Fire Department; Sewerage; Printing.

Friday evening—Accounts.

First Friday evening after first Monday each month—State Aid, Military Aid and Soldiers' Relief.

MAYOR'S
INAUGURAL ADDRESS.
1897.

HON. ANDREW R. CURTIS, MAYOR.

INAUGURAL ADDRESS
OF
HON. ANDREW R. CURTIS.

DELIVERED JANUARY 4, 1897.

Gentlemen of the City Council:

It is with deep feelings of gratitude to my fellow citizens that I again assume the responsibilities of this office. Encouraged by the confidence thus reposed in me I enter upon my duties with a renewed determination to sacredly guard the interests intrusted to my keeping, and to labor with what ability I possess to promote the welfare of this, my native city.

In this, my resolve, I am confident that I am joined by you, and that together we shall not only make this, our administration, one that will be highly acceptable to our citizens; but one that in after years we may look back upon with feelings of pride and consciousness of duty well performed.

Before engaging in our duties, which will require us to act upon measures where the interests of our city are deeply involved, let us insist upon their careful consideration, not only in the committee rooms, but in the council chamber, where all the members may have a right to pass upon them, and where the people can determine whether or not we, their servants, have been faithful to the trust reposed in us.

Under existing conditions the responsibilities for extravagance in expenditures cannot be fixed, because the power which has heretofore been exercised solely by the City Council is now delegated to the committees.

The mayor, presumably for the reason that he is the central figure, is often held responsible for expenditures of which he knows no more than if he were a resident of one of our neighboring towns. Nor is it possible for him to know, so long as committees are permitted to expend the public funds. To be sure the mayor has been invested with the veto power and can disapprove any measure passed by the City Council but if the entire appropriation is expended by the committees, and contracts made which oblige the city to perform certain acts, how is this power to be exercised, and how can he interpose to check extravagance or any infringements upon the rights of city? In fact, the mayor's power consists

wholly, and is determined by the amount of personal influence he can exert upon the members of the City Council.

Last year an order was passed by the City Council instructing the mayor to petition the legislature for an amendment to the city charter, providing for the election of seven aldermen, one of whom was to preside at all meetings of the City Council. If this had become a law the mayor would have been deprived of even that power, and he would have become a nonentity in city affairs. Had the amendment contained a proviso which would have enabled the mayor to pass upon all business transacted either by the City Council or committees I believe it would have met with public approval. I would therefore recommend that the amendment petitioned for, be further amended by adding the words "all business transacted by either branch of the City Council or its committees shall be submitted to the mayor for his approval."

FINANCE.

As a financial statement has been published in our local papers I will not detain or weary you by going into details. The expenditures of last year were \$451.05 less than the appropriations and income, which sum has been added to the sinking fund.

The public debt shows an increase of \$6,731.12. This increase is due principally to the expense of \$28,195.43, which has been incurred by the water hearings; had it not been for this expense there would have been a decrease of the debt \$21,464.31, instead of an increase of \$6,731.12.

The city holds 411 shares of Boston & Maine railroad stock. At the close of the financial year ending December 19, 1896, the market value of this stock per share was \$165 which if sold at said price would have reduced the public debt \$67,815. Although these shares were taken by the way of trade at \$180; yet the cash balances and dividends received have reduced the net cost of these shares to the city, to about \$175 or \$71,925. During the past year this stock has fluctuated but at no time has it reached that figure, when by selling it we could recover that amount.

Now a few words about the public debt. It is safe to predict that no one, however young he may be, will ever live to see that time when our city will be free from debt. As fast as it is decreased, the requirements of passing years will increase it. Old buildings must be replaced by new ones, bridges rebuilt, and many other expenses incurred to supply the wants and desires of our citizens. As it has been, so it will continue until time is no more. But even

though our debt today were liquidated, yet the tax rate could not be materially diminished unless we retrenched in our expenses. I trust that you will do this, and this year take the first step to lessen the burdens of our citizens by reducing taxes.

WATER QUESTION.

One of the most important matters pertaining to the welfare of our city is the legal contest between the city and the Newburyport Water Company. Although the settlement of this case has been delayed beyond what many deemed to be a reasonable time yet I can assure you that the delay was not occasioned directly or indirectly by the city's counsel. At all stages of the proceedings they have been ready and eager to push the matter to a conclusion.

The present standing of the case is as follows:

The commissioners have made a report of their award, which is \$275,000, about one-quarter of the amount which expert witnesses for the water company testified the works to be worth. This award will not be final until accepted by the Supreme Court of the commonwealth, and will not be accepted until the court passes upon some questions of law, which the commissioners are to report to it at once.

The fees and expenses of the commissioners amounting to \$8450, have been paid by the city. As it was an open question to be decided by the court, whether or not this money should be paid in part by the company or wholly by the city, this payment was made under protest and our rights have been carefully protected.

HIGHWAYS.

The committee on highways, consisting of the mayor and aldermen and one councilman from each ward, elects the superintendent, purchases all supplies and all material required in the highway department, makes contracts, and designates all streets to be improved. In other words, it has absolute control of highway affairs.

Although the Common Council is represented upon this committee by six of its members, yet if the mayor and aldermen, who are a majority of the same, were to agree to make any improvement, which would require the expenditure of the entire highway appropriation, they could do so, even if every member of the common council were opposed to it. Surely this preponderance of power, which can and which does exclude the common council from acting upon measures in which the welfare of

our city is so deeply involved, does not and cannot insure for such measures a proper and careful consideration. Nor have they been so acted upon, for his committee which has arrogated to itself this authority and which has expended over \$213,000 upon highways and sidewalks during the past seven years, has never even pretended to exercise any such care.

From the first there has been a constant struggle among the members of the committee to obtain all for that part of the city in which they were directly interested, and as a result of this struggle thousands of dollars have been expended for work that the public convenience did not require. Not only is this true but for what has been expended not even a fair equivalent has been received. Neither can this paucity of results be attributed to the inefficiency of the superintendent, for even he was compelled to surrender his individuality and become the obedient servant of several masters. He was expected and did not only hire and retain in the highway service, men, many of whom were disqualified by their age or by their predispositions to evade "in so far as possible" the primeval curse imposed upon mankind, but he was to do the work when and where each would have him do it. In the nonsensical scramble which has ensued is it suprising that feeble energy was diversely applied and very meagre results attained?

And now gentlemen I would recommend that the business which has heretofore been transacted by the committee on highways, be transferred to, and acted upon by the council where each may have equal rights and equal responsibilities, and where rules have been provided which will insure for this business a proper and careful consideration. Mark the contrast. An order originating in the council, which calls for the expenditure of even \$1 requires two readings before it can be finally acted upon. But in the committee on highways thousands can be expended without even a vote. Surely this is a case of penny wise and pound foolish. I would also recommend that the superintendent be elected by the city council for a longer term, or during good behavior, and that he be invested with the power to hire men and made responsible for the appropriation provided for highways. If these changes are made I am confident that good results will surely follow.

Then again in the construction of our roads, I believe that too much money has been expended. If upon several of the streets which have been macadamized, a No. 2 grade of crushed stone overspread with a thin layer of screen gravel had been used the same as was put upon Merrimac street and Summit place, not only a great saving could have been effected but the results would have been as satisfactory.

Although upon Summit place there has not been a great amount of travel, yet no one who has seen its present condition, will doubt that the roadway is capable of sustaining travel should it ever be needed for that purpose. Merrimac street was completed nearly four years ago and notwithstanding it has been severely tested by a large amount of heavy travel, its condition today will compare very favorably with any road which was constructed at that time of the more costly material.

SIDEWALKS AND EDGESTONES.

During the past year \$3,647.29 have been expended for sidewalk improvement; of this amount \$1,058.46 have been assessed upon abutters for betterments. Although this expenditure is small in comparison with that of previous years, yet in my judgment it is far more than it should have been.

I said last year in dealing with the affairs of this department that these improvements were extremely burdensome to our citizens. I am still of the same opinion, and would urgently recommend that less of this work be engaged in during the ensuing year.

PUBLIC SCHOOLS.

The public schools of this city are in 41 school rooms with 1573 pupils, in charge of a superintendent and 43 instructors. That good work has been done in this important branch of public service is manifested from the result obtained. There is no doubt that our schools for training the young will compare favorably with similar institutions in other cities. There can be no public interest more worthy of our care than that by which our children are trained to become intelligent citizens of a free country. I call especial attention to this interest and trust that you will further the wishes of the school board in their efforts to subserve the interest of those who in a few years must take our places as citizens. For a more particular account I would refer you to the report of the school committee soon to be published.

The accommodations furnished for primary school children, in some parts of the city have been insufficient and in many cases unwholesome. This was especially true of the schoolhouses on Ashland street. The two story building being of an old pattern was entirely unfit for a proper classification of the children, and so small that a portion of the school was obliged to use the ward room on the same street.

The size of the old schoolhouse was such that the two rooms in it could not be made into four, as in the Forrester street building, and so the school committee requested the city government to enlarge it in such way as to furnish two additional rooms. The building is now completed and consists of four large well lighted and well ventilated rooms, heated with steam, furnished with neat sanitary conveniences in the basement and surrounded with ample play grounds. The use of the new school house will allow the ward rooms in wards 5 and 6 to be closed as school rooms and will permit a better classification of eight schools numbering more than three hundred pupils.

Many improvements in the other schoolhouses have been made where health and convenience required, and our school buildings may on the whole be considered to be in as good condition as they can be without material alteration in their shape and size.

POOR DEPARTMENT.

The affairs of no department in this or any other city, have been better managed than this one. The system adopted by the board, several years ago, of purchasing its supplies of the best quality, at the lowest market rates, has saved many thousands of dollars for our city.

Permit me at this time to say that, after twelve years of faithful and efficient service, Mr. John C. Stevens retires from the board of overseers with the respect and esteem of his colleagues, and the love of all whose circumstances were such as to require the help of the department which he so ably and kindly represented. All of our citizens will, I think, join with me in wishing him a long, peaceful and happy rest in his retirement from the cares of official life.

While in other cities the expense of providing for the poor has greatly increased, ours has decreased, as will be seen by the following report. Total cost of the poor department for the year ending November 30, 1896, has been \$22,723.49; of this amount \$5,987.35 was paid for the support of insane, an expense over which the board has no control; \$2,280.91 was paid for wood and coal. For improvement on almshouse, including altering steam pipes, 32 radiators, repointing the brick work on the outside of the almshouse, painting and for curtains, \$931.60; \$350 was paid for city physician for services, and \$350 for medicine.

The income received during the past year from various sources was \$3,797.18, showing the actual amount expended by the overseers to have been \$18,926.31, from which should be taken the improve-

ments on the almshouse property—\$931.60, leaving the actual cost of caring for our poor \$17,994.71, which is \$397.51 less than last year.

FIRE DEPARTMENT.

On account of the excellent showing made by the committee and the chief engineer in the management of the affairs of this department I desire especially to call your attention to the following statement.

The appropriation, including credits, was \$9,903.60 and the expenditures were \$9,302.14, leaving an undrawn balance of \$601.46. \$1,825 of this amount was expended for permanent men and for horses; \$185 for placing a new fire alarm box on Toppan street and for relocating and repairing the wire, which now places the system in perfect condition. The department has responded to 17 bell and 40 still alarms.

The promptness and efficiency of the firemen for which they have ever been distinguished have undoubtedly been the means of preventing many of these still alarms from becoming more serious.

POLICE.

During the past year no valid complaints have been made against the police. Gentlemanly in their deportment, prompt and alert in the discharge of their duties, they have won the respect of all. The routes patrolled have been extended, and now include the greater portion of our city. This has added largely to the feeling of security which now exists among owners of property.

ATKINSON COMMON.

Under the skilful directions of Mr. Nelson, superintendent of the almshouse, this common is being greatly improved. Although it will require many more years to complete it, yet already enough has been accomplished to make it very attractive. The money to defray the expenses of this work was furnished principally by the Belleville Improvement Society, which was organized some three years ago for that purpose. As this common is situated upon the highest land in our city, adjacent to its most beautiful thoroughfare, it will within a few years become the centre of attraction for those who admire variety of scenery. One year ago I recommended that a small sum be annually appropriated for

the purpose of assisting the B. I. S. in their commendable efforts to improve this common, and thus make attractive our city. I would urge the same this year.

CONCLUSION.

In conclusion permit me to say, that I have not recommended anything which will require the expenditure of a large amount of money, for under existing conditions I fully realize, as I trust you do, that the people can ill afford to be burdened with unusual expenses. I have, however, endeavored to impress upon your minds the importance of making some changes that will, in my opinion, insure for our city a more economical administration of its affairs. In the employment of this term economical, I do not wish to be understood as advocating that pseudo economy which results in retrogression and decay, and which would cause our city to be made the centre of attraction for the traveller in search of the antique, for I am not. What I do mean, however, is that a fair equivalent should be exacted for the expenditure of an appropriation, which will be sufficient to insure for our city a standing among the progressive cities of our commonwealth, without unnecessarily increasing the burdens of our citizens.
